

Invenergy drives innovation in energy.

Powered by decades of entrepreneurial experience and unparalleled execution, we solve the energy challenges facing our customers and communities.

We provide power generation and storage solutions at scale around the world to create a cleaner energy future.

We are Invenergy.

FULL PORTFOLIO

105 projects 15,915 MW

Our Projects

While others talked, we began to build.
Today, we have developed more than 15,900 megawatts
of energy across a total of 105 projects.

- Wind
 - Solar
 - Natural Gas
 - Advanced Energy Storage
 - Regional Office
 - Corporate Headquarters
- Note: Multiple projects at some locations

As of June 1, 2017; includes projects that are operating, in construction or contracted. Renewables include wind, solar and storage.

What We Do

We solve the energy challenges facing our customers and communities.

Wind Projects 

- Largest independent wind power generation company in North America.
- Extensive global wind energy portfolio in operation, construction and contracted.

Solar Projects 

- Significant global pipeline of projects in various stages of operation, construction and contracted.
- Successfully developed more than 200 MW in utility-scale solar projects.

Advanced Energy Storage Projects 

- North America's leading advanced energy storage owner/operator.
- Leader in customized solutions to meet customers' unique system requirements: fast frequency regulation, renewable smoothing, peak shifting, energy arbitrage.

Natural Gas Projects 

- Portfolio includes natural gas-fueled electric generating projects in operation, construction and contracted.
- Includes development of both green field projects and acquired facilities.

Operations & Maintenance

- Recognized leader in asset-based operations & maintenance with a staff of 450 dedicated to project safety, reliability and financial performance.
- Cultivate successful, long-term relationships with our host communities, power purchase partners & contractors.

Invernergy Control Center

- Remotely operate the portfolio 24/7 from a state-of-the-art control center in Chicago.
- Functions as liaison to generation facilities, power markets, off-takers and transmission providers both as required in real-time, as well as for future planning.

Invenergy is headquartered in Chicago and is North America’s largest independent renewable power generation company.

Invenergy is led by an experienced management team whose leadership shapes the company’s strategic vision. With a focus on relationships, execution and sustainability, Invenergy and its affiliated companies develop, own and operate large-scale renewable and other clean energy generation and storage facilities in the Americas and Europe.

Gross Total MW

Includes projects that are operating, in construction or contracted.
