RE: Advanced Energy Gross Receipt Tax, Reinstatement of Section 7-9-114: Advanced energy deduction; gross receipts and compensating taxes, retroactive to 2017 and extended through 2021

Dear Mr. Chair Carlos R. Cisneros and Committee Members of the Revenue Stabilization and Tax Policy Committee:

RPCS (RP Construction Services Inc.) is one of the many companies in our group supporting the reinstatement of the Advanced Energy Gross Receipts Tax Deduction in New Mexico. This company has a long-term investment outlook into the solar energy market, as well as local venture into the city of Albuquerque.

By approving the Advance Energy Gross Receipts Tax Deduction, this would benefit the continued production of RPCS supplies and investments into the local Albuquerque market, which employs about 50 employees. Supporting the local community and the ability to provide New Mexicans with competitive living wages, is one of the many positive outcomes of advocating for a solar industry business like RP Constructions Services in the New Mexico state.

This group member supports the retroactive reinstatement of the Advanced Energy Deduction and intends to work with sponsors, committee members and stakeholders as needed to present a bill for consideration in the up-and-coming regular session. RPCS urges Committee Members of the revenue Stabilization and the Tax Policy Committee, to support such a bill that will promote job creation, stimulate local economies, and expand a viable energy resource.

Sincerely,

Eben Russell
President

RE: Advanced Energy Gross Receipt Tax, Reinstatement of Section 7-9-114: Advanced energy deduction; gross receipts and compensating taxes, retroactive to 2017 and extended through 2021

Dear Mr. Chair Carlos R. Cisneros and Committee Members of the Revenue Stabilization and Tax Policy Committee:

Array Technologies, Inc. is one of the many companies in our group supporting the reinstatement of the Advanced Energy Gross Receipts Tax Deduction in New Mexico.

Array Technologies is the global leader in the design and manufacture of large scale solar tracking systems and has been manufacturing solar products in Albuquerque, New Mexico since 1989. Array has supplied more than 20,000 reliable solar trackers and more than 6 gigawatts to commercial and utility-scale solar projects around the globe. Throughout our history, we have exclusively focused on designing and manufacturing solar tracking equipment in the state.

We have a long-term investment outlook into the solar energy market, we are headquartered in Albuquerque and undertake the primary functions of running international business including supply NM jobs.

By approving the Advance Energy Gross Receipts Tax Deduction, this would benefit the continued operations of Array Technologies and including the substantial investments into the Albuquerque market, which directly employs approximately 300 people locally. Supporting the local community and the ability to provide New Mexicans with competitive living wages, is one of the many positive outcomes of advocating for a solar industry business like Array Technologies in New Mexico.

This group member supports the retroactive reinstatement of the Advanced Energy Deduction and intends to work with sponsors, committee members and stakeholders as needed to present a bill for consideration in the up-and-coming regular session. Array Technologies urges Committee Members of the revenue Stabilization and the Tax Policy Committee, to support such a bill that will promote job creation, stimulate local economies, and expand a viable energy resource.

Sincerely,

Ron Corio

CEO

Array Technologies, Inc.

RE: Advanced Energy Gross Receipt Tax, Reinstatement of Section 7-9-114: Advanced energy deduction; gross receipts and compensating taxes, retroactive to 2017 and extended through 2021

Dear Mr. Chair Carlos R. Cisneros and Committee Members of the Revenue Stabilization and Tax Policy Committee:

DKD Electric is one of the many companies in our group supporting the reinstatement of the Advanced Energy Gross Receipts Tax Deduction in New Mexico. As a regional leader in the renewable energy industry, DKD Electric is committed to providing its customers with quality services. DKD Electric has successfully completed over 370 MW of solar projects that have both set industry standards and met clients' expectations. We are an active supporter of renewable energy and are dedicated to expanding our clean energy knowledge and expertise.

This company has a long-term investment outlook into the solar energy market, as well as local venture into the city of Albuquerque.

By approving the Advance Energy Gross Receipts Tax Deduction, this would benefit the continued production of DKD Electric supplies and investments into the local Albuquerque market, which currently employs 216 people. Supporting the local community and the ability to provide New Mexicans with competitive living wages is one of the many positive outcomes of advocating for a solar industry business like DKD Electric in the state of New Mexico.

This group member supports the retroactive reinstatement of the Advanced Energy Deduction and intends to work with sponsors, committee members and stakeholders as needed to present a bill for consideration in the up-and-coming regular session. DKD Electric urges Committee Members of the revenue Stabilization and the Tax Policy Committee, to support such a bill that will promote job creation, stimulate local economies, and expand a viable energy resource.

Sincerely,

Josh Brokaw
