

## Los Vigiles Land Grant 10 year strategy/updated Stewardship Plan – Process

### Goals and Objectives:

- Update Stewardship/Forest Management plan
  - Work with Forestry Division to update site assessment and determine management strategies moving forward
- Land Grant will identify Management Objectives
  - ex. identify needs to keep roads open, clear debris as flooding occurs
  - ex. identify strategies for managing flooding
  - ex. develop strategy for safely and effectively working through easement concerns, in order to have access for keeping roads clear after flood events
  - ex. expand removal of hazardous trees along main access roads as first priority
  - ex. soil stabilization through contour falling and seeding as needed, identify priority locations and create maps for funding requests and to guide implementation locations on the ground
  - ex. identify potential locations for reforestation, identify timeline, site prep needed and develop budget and timeline for project implementation, develop planting prescription and map planting sites (using modeling software for determining appropriate reforestation sites)
  - Identify any cross boundary opportunities with neighboring landowners to streamline treatment and improve access across a larger landscape for implementation
- This 10 year guidance document will include applicable updates to the Forest Stewardship Plan, relative to post fire recovery needs. The plan will identify management priorities and help lay out a budget, timeline and strategies for tasks and steps needed to achieve restoration on this property.

## Sample Plan Outline:

- Overview of the land
  - Historical uses
  - Impacts of HPCC
  - Recovery activities to date
- Brief statement on purpose and need for the plan (threats and long-term impacts of fire)
- Current conditions
- Desired uses of land/Desired conditions
- Management Objectives to achieve desired uses/conditions (list from your doc)
  - Road management
  - Veg management
  - Erosion control/flooding
  - Wildlife
  - Water
  - Reforestation
- Partnerships and funding sources that can help with management
  - Grants
  - Cross boundary opportunities
  - Etc.

Recommended project list, budget, and timeline
