General Fund Revenue Tracking Report: May 2013 Accrual

This LFC general fund revenue tracking report reflects revenue accruals through May 2013. The Department of Finance and Administration produces a similar report, which can be found on the DFA website: [http://www.nmdfa.state.nm.us/New Mexico Economic Summary.aspx](http://www.nmdfa.state.nm.us/New_Mexico_Economic_Summary.aspx).

Summary. Recurring state revenues for FY13 are tracking at \$5,690 million, \$24 million (0.4) percent, more than the February 2013 estimate. A significant change from the forecast is that May corporate income tax revenue was \$2.4 million, \$26 million less than the amount forecasted for that month. The \$471 million revenue accrual reported for May (see table 2) continues to show strength in revenue from personal income taxes. Federal mineral leasing revenue remains subdued due to sequestration reductions, and lease bonuses and rents paid to the State Land Office are tracking below the estimate. Table 1 shows fiscal year-to-date general fund recurring revenues are \$4,960 million, a decrease of \$179 million, or 3.5 percent, compared to the same period a year ago.

Table 1
General Fund Revenue Accruals: FY13 vs FY12
(in millions of dollars)

Revenue Category	Fiscal Year-to-Date Through May		Year-over-Year Growth	Projected Full-Year Growth: February 2013 Forecast
	FY12	FY13		
General Sales Taxes (GRT & Comp)	\$1,807.4	\$1,780.8	-1.5%	-0.1%
Personal Income Tax	\$971.8	\$1,057.6	8.8%	1.1%
Corporate Income Tax	\$221.9	\$207.2	-6.6%	-5.7%
Oil & Gas Revenues *	\$980.8	\$829.2	-15.5%	-9.0%
Investment Income & Other	\$1,157.8	\$1,085.6	-6.2%	-2.7%
Total Recurring Revenue	\$5,139.7	\$4,960.4	-3.5%	-2.4%
Total Recurring Excluding Oil & Gas	\$4,158.9	\$4,131.2	-0.7%	-0.9%

* Oil & Gas revenues include mineral production taxes and rents & royalties.

May Year-to-Date Revenue. As shown in Table 1, year-to-date general sales taxes (GRT & Comp) declined 1.5 percent from FY12. Receipts from personal income taxes (PIT) are tracking 8.8 percent above the prior year, and 4.5 percent above the FY13 estimate (see table 2). Corporate income tax (CIT) receipts are tracking \$4.2 million, or 1.6 percent, above the February estimate, but they show a year-to-date decline of 6.6 percent.

Strength in oil prices and volumes has offset weaknesses in gas. The average price of San Juan dry gas was \$3.71/mcf in March, and \$3.95/mcf in April, \$3.89/mcf in May, and \$3.66/mcf in June; however, this is higher than the average price of \$2.85 in August and September.

Mineral production taxes are 1.8 percent over estimate; and rents and royalties are tracking 4.0 percent below the estimate, due largely to the sequester of FML revenues and due to State Land Office royalties tracking nearly 25 percent below the estimate. The Energy Information Administration expects US oil demand to increase modestly in 2013 and 2014 after falling in 2012.

Explanation of Revenue Tracking Method. Table 2 shows the latest consensus revenue estimates and monthly accruals in detail. These estimates were based on data available through November and finalized in February 2013. The monthly numbers shown in bold are actuals as reported by the Department of Finance and Administration. The entries in italics are extrapolated from Taxation and Revenue Department accounting documents. The entries in ordinary typeface are a monthly allocation of the annual estimate for the remaining months, based on seasonal historical patterns. They are prepared by LFC staff.

The four shaded columns are of particular importance. The column labeled “FY13 Actual + Estimate” is a sum of monthly DFA actuals, TRD accounting documents, and LFC estimates. The column entitled “FY13 Feb 13 Estimate” is the latest consensus revenue estimate. The next two columns calculate the tracking change in percentage and absolute terms, respectively.
