(b) Emergency supplemental	1,017.0				1,017.0
(c) Emergency capital outlay	822.0				822.0

The rate of distribution of the state equalization guarantee distribution shall be based on a program unit value determined by the superintendent of public instruction. The superintendent of public instruction shall establish a preliminary unit value to establish budgets for the 2000-2001 school year; and then upon verification of the number of units statewide for fiscal year 2001, but no later than January 31, the superintendent of public instruction may adjust the program unit value.

It is the intent of the legislature to maximize and strengthen direct student instruction and learning. Continual, comprehensive and uninterrupted instruction by a certified school instructor shall be provided for a total of one hundred eighty teaching days in a school year. Local school boards shall schedule professional development and in-service activities at times that do not interfere or interrupt instructional time during the one hundred eighty teaching days in a school year. In approving the budget for a school district, the state department of public education shall ensure that each local school board increases the school year by at least two additional days for professional development.

The legislature encourages local school districts to develop and implement school-based art programs.

The appropriation for the state equalization guarantee contains sufficient funds to provide a six and one-fourth percent salary increase for teachers, a five and three-fourths percent increase for other instructional staff and a five percent salary increase for other certified and noncertified staff, including transportation employees. Included in the six and one-fourth percent salary increase for teachers is one-fourth percent for teacher merit pay. The superintendent of public instruction shall distribute the additional one-fourth percent salary increase for teachers upon approval of a plan submitted by a local school board for teacher merit pay. The local school board shall demonstrate evidence of teacher involvement in the development of the district's teacher merit pay plan and that the plan includes components linking teacher merit pay to student performance and that it is based on objective and measurable criteria.

For the 2000-2001 school year, the appropriation for the state equalization guarantee distribution includes sufficient funding for enrollment growth in districts from the 1999-2000 to the 2000-2001 school year. In addition to the additional program units provided by Section 22-8-23.1 NMSA 1978, for the 2000-2001 school year, a school district with an increase in MEM equal to or greater than one percent, when compared with the immediately preceding year, shall be entitled to supplemental additional program units computed by the following formula for enrollment growth: (MEM for current year - MEM for prior

year) x 1.36 = Units.					
For the 2000-2001 school year, the appropriation for the state equalization guarantee distribution includes sufficient funding for districts implementing a formula-based program for the first time. Those districts shall use current MEM in the calculation of program units for the new formula-based program.					
Included in the state equalization guarantee are sufficient funds for the purpose of funding additional program units for reading improvement initiatives, kindergarten to grade three, to ensure that, by the end of grade three, all students are reading at grade level. The state department of public education shall distribute funds, upon program approval, to school districts with schools that develop reading improvement programs based on the most current research-based models in the teaching of reading. The department shall distribute funds based on the number of program units determined by multiplying the number of children in the reading improvement initiative by the cost differential factor .048. The department shall monitor the programs and ensure that they serve the children most in need based upon age-appropriate assessments. If the department determines that a program is not meeting the benchmarks necessary to ensure the progress of students in the program, the department shall notify the school district that failure to meet the benchmarks within sixty days will result in the cessation of funding for the program. The department shall compile the results of the program and report to the legislative education study committee and the legislative finance committee by December 2000 on the effectiveness of the programs.					
Included in the state equalization guarantee distribution are sufficient funds for additional program units in optional preschool/full-day kindergarten programs to: (1) implement or expand full-day kindergarten; (2) implement or expand half-day programs for children ages three through five; and (3) implement or expand summer programs or transition programs for children ages three through five. The state department of public education shall distribute funds, upon program approval, to those schools with the highest proportion of students most in need based upon indicators of the at-risk index and to schools with available classroom space. The department shall distribute funds by calculating the early childhood education MEM of 1.0, not including developmentally disabled three- and four-year-old students, multiplied by 0.144. The department shall monitor the programs to measure the progress and effectiveness of the programs. If the department determines that a program is not meeting the benchmarks necessary to ensure the progress of students in the program, the department shall notify the school district that failure to meet the benchmarks will result in the cessation of funding for the following year. The department shall compile the results of the program and report to the legislative education study committee and the legislative finance committee by December 2000 on the effectiveness of the programs.

Section 5. **PERFORMANCE-BASED BUDGET APPROPRIATIONS.**--The following amounts are appropriated from the general fund or other funds as indicated for the purposes specified for expenditure in fiscal year 2001 pursuant to the Accountability in Government Act. Unless otherwise indicated, any unexpended or unencumbered balance of the appropriations remaining at the end of fiscal year 2001 shall revert to the appropriate fund.

Under guidelines developed by the state budget division, in consultation with the legislative finance committee, each agency for which appropriations are made or for which performance measures are established in this section shall file a report with the state budget division and legislative finance committee analyzing its performance relative to the attainment of performance standards. The report shall be submitted quarterly for the performance standards established in this section and annually for the remaining performance standards stated in the performance-based budget request submission and shall contain a comparison of actual performance for the report period with targeted performance based on the level of funding appropriated. In developing guidelines for the submission of agency performance reports, the state budget division shall establish standards for and the reporting of variances between actual and targeted performance levels. The annual and quarterly reports for the period ending June 30, 2000 shall be filed with the state budget division and the legislative finance committee on or before September 1, 2000.

In concert with the annual agency strategic planning process required by the state budget division, the state budget division shall require that strategic plans, including internal and external assessments and development of performance measures, be coordinated among the state agency on aging, human services department, department of health and the children, youth and families department.

Section 13. **CERTAIN FISCAL YEAR 2001 BUDGET ADJUSTMENTS AUTHORIZED.--**

A. As used in this section:

(1) "budget category" means an item or an aggregation of related items that represents the object of an appropriation. Budget categories include personal services, employee benefits, travel, maintenance and repairs, supplies and materials, contractual services, operating costs, other costs, capital outlay, out-of-state travel and other financing uses;

(2) "budget increase" means an approved increase in expenditures by an agency from a specific source;

(3) "category transfer" means an approved transfer of funds from one budget category to another budget category, provided that a category transfer does not include a transfer of funds between divisions;

(4) "division transfer" means an approved transfer of funds from one division of an agency to another division of that agency, provided that the annual cumulative effect of division transfers shall not increase or decrease the appropriation to any division by more than seven and one-half percent; and

(5) "federal funds" means any payments by the United States government to state government or agencies except those payments made in accordance with the federal Mineral Lands Leasing Act and except those payments made in accordance with the federal temporary assistance for needy families block grant and the federal Workforce Investment Act of 1998.

B. Budget adjustments are authorized pursuant to Sections 6-3-23 through 6-3-25 NMSA 1978 for fiscal year 2001.

C. Except as otherwise provided, all agencies may request category transfers among personal services, employee benefits, travel, maintenance and repairs, supplies and materials, operating costs, other costs, capital outlay, out-of-state travel and other financing uses.

D. The corrections department may request division transfers. The corrections department may request category transfers.

E. An agency with internal service funds and interagency transfers appropriations or other state funds appropriations that collects money in excess of those appropriated may request budget increases in an amount not to exceed four percent of its internal service funds and interagency transfers or other state funds appropriation contained in Section 4 and Section 5 of the General Appropriation Act of 2000.

F. In order to track the four percent transfer limitation outlined in Subsection F, agencies must report cumulative budget adjustment request totals on each budget adjustment request submitted. The department of finance and administration shall certify agency reporting of these cumulative totals.

G. In addition to the budget increase authority provided in Subsection F of this section, the
