SUMMARY

Synopsis of Bill

Senate Bill 291 appropriates \$170.0 to the community college board of Santa Fe Community College to fund an allied health research and public service project.

Significant Issues

This bill requires Santa Fe Community College (SFCC) to partner with St. Vincent Hospital, the public schools, and the University of New Mexico to develop an allied health research and public service project to provide quality certification and associate degree programs for hospital health care workers.

This special project was not submitted to the Commission for Higher Education (CHE) for funding consideration, and the CHE does not recommend funding this program expansion.

According to the State Department of Education (SDE), there are currently numerous concurrent enrollment programs in the state that provide opportunities for students to receive college credit while in high school. This legislation could lead to development of a certificate and associate degree program for hospital health care workers.

FISCAL IMPLICATIONS

The appropriation of \$170.0 contained in this bill is a recurring expense to the general fund. Any unexpended or unencumbered balance remaining at the end of FY02 shall revert to the general fund. SFCC development of a certificate and associate degree program for hospital health care workers would have a future fiscal impact on the general fund.

AMENDMENTS

The CHE suggests the following language for all new recurring higher education programs and expansion of current programs (assuming that funding will continue beyond 2001-2002):

"The institution receiving the appropriation in this bill shall submit a program evaluation to the Legislative Finance Committee and the Commission on Higher Education by August 2, 2004 detailing the benefits to the State of New Mexico from having this program implemented for a three-year period."
