SUMMARY

Synopsis of Bill

Senate Finance Committee substitute for Senate Bill 212 authorizes \$827.7 million, including approximately \$681.1 million from severance tax bond (STB) capacity, \$30 million from general fund (GF) and approximately \$116.6 million from other state funds for the purpose of funding capital outlay projects statewide. *A listing of the projects funded in this bill is attached.*

This bill contains an emergency clause and would become effective immediately upon signature by the governor.

FISCAL IMPLICATIONS

The estimated net severance tax bond (STB) capacity in fiscal year 2022 is \$681.1 million after deductions from the estimated \$847.6 million senior STB gross capacity. Deductions from gross capacity include: \$14 million for authorized but unissued bonds; 9 percent of capacity equal to \$76.3 million for deposit into the water project fund; 4.5 percent of capacity equal to \$38.1 million for deposit into the tribal infrastructure project fund; and 4.5 percent of capacity equal to \$38.1 million for deposit into the colonias infrastructure project fund. The fiscal year 2022 estimated bonding capacity includes supplemental severance tax bonds (SSTB) totaling \$243.2 million for public school construction.

The appropriations and authorization to expend funds in this bill are nonrecurring expenses to STB capacity, the general fund, and other state funds. Any unexpended or unencumbered balance shall revert to the originating fund. Except for appropriations to the capital program fund, money from appropriations made in this act shall not be used to pay indirect project costs.

Significant growth in SSTB capacity and fewer construction awards to eligible schools by the Public School Capital Outlay Council (PSCOC) have contributed to growth in the balance of the public school capital outlay fund (PSCOF). As of January 2022, PSCOC reports uncommitted balances in the fund for FY22 will reach \$395.6 million, which the council anticipates will further increase to \$795.4 million by FY26 due to the additional FY22 SSTB capacity.

The bill authorizes \$75 million transferred from balances of the PSCOF to the Public School Facilities Authority (PSFA) for distribution to each school district in fiscal year 2023 for the maintenance and repair of public school buildings in fiscal year 2023 and subsequent fiscal years. The PSFA shall make the distribution to each school district in a manner such that each school district receives the greater of \$100 thousand or a percentage of the total appropriation equal to the percentage attributable to that school district from the total distributions made to school districts in fiscal year 2023 pursuant to the Public School Improvement Act. The distribution is not subject to any local match or offset otherwise required by the act.

The bill authorizes \$10.6 million from STB to the Indian water right settlement fund for expenditure by the Interstate Stream Commission in fiscal year 2023 and subsequent years to implement the state's portion of the Aamodt settlement case. Unencumbered or unexpended funds at the end of a fiscal year do not revert. The \$32 million for the Aamodt settlement in Section 10 of HB2/HAFCS/aSFC, combined with the appropriation in this bill, is expected to fully fund the state's current share toward the settlement.

For the purposes in Sections 1, 2, and 3, "unexpended balance" means the remainder of an appropriation after reserving for unpaid costs and expenses covered by binding written obligations to third parties. Money that is appropriated from the proceeds of STB, the general fund (GF), and other state funds pursuant to this act shall not be subject to a binding written agreement with a third party prior to the authorized state agency's approval to enter into that agreement.

In compliance with the Severance Tax Bonding Act, the State Board of Finance (BOF) is authorized to issue and sell STB in an amount not to exceed the total of the amounts appropriated in this bill. BOF must also comply with the Internal Revenue Code of 1986, as amended. The agencies named in this bill shall certify to BOF when the money from the proceeds of the severance tax bonds authorized in the bill is needed for the purposes specified in the applicable section of the bill. Before an agency certifies for issuance of the bonds, the project must be developed sufficiently so that the agency reasonably expects to: 1) incur a substantial binding obligation to a third party to expend at least 5 percent of the bond proceeds for the project within six months after the applicable bonds have been issued; and 2) spend at least 85 percent of the bond proceeds within three years after the applicable bonds have been issued.

Based on the certification of project readiness by grantees, BOF authorizes the sale of bonds. The issuance of tax-exempt bonds for projects not ready to commence leaves the state open to noncompliance with the Internal Revenue Service (IRS) Code. Failure to spend STB proceeds in a timely manner causes the state, under IRS regulations, to have to rebate interest earnings the state could otherwise use to reduce the cost of a project or to reduce debt service costs. If an agency has not certified the readiness for STB issuance by the end of fiscal year 2024, the authorization is void.

Sections 1 and 3 provide that the unexpended balance from proceeds of STB and fund appropriations other than GF shall revert to the severance tax bonding fund or originating fund no later than the following dates: 1) proceeds to match federal grants, six months after completion of the project; 2) for a project for which an appropriation was made to purchase vehicles, including emergency vehicles and other vehicles that require special equipment; heavy equipment; books; educational technology; or other equipment or furniture that is not related to a more inclusive construction or renovation project, at the end of the fiscal year two years following the fiscal year in which the appropriation was made for the purchase; and 3) for any other projects, within six months of completion of the project, but no later than the end of fiscal year 2026.

Section 2 provides that the unexpended balance from an appropriation made from the general fund shall revert no later than September 30 following: 1) the end of fiscal year 2023 if the project for which an appropriation was made has less than 5 percent of the project's total appropriation amount subject to a binding written agreement with a third party on that date; 2) at the end of fiscal year 2024 for the purchase of vehicles, including emergency vehicles and other vehicles that require special equipment; heavy equipment; books; educational technology; or other equipment or furniture not related to a more inclusive construction or renovation project; 3) at the end of fiscal year 2026 for a project related to an inclusive construction or renovation project; or 4) within six months of completion of the project, but no later than the end of fiscal year 2026.

SIGNIFICANT ISSUES

The bill includes from severance tax bond capacity \$250.8 million for state agencies, \$22 million for judicial projects, and \$17.9 million for higher education institutions, tribal, and special schools. The bill has an additional \$116.6 million in other state funds for state agencies and \$30 million for tribal senior projects statewide from general fund.

The bill also includes \$390.4 million requested by the executive, House and Senate members for local and tribal capital projects statewide. The major projects include funding for water and wastewater, roads, public health and safety facilities, cultural facilities, recreation facilities, vehicles, and equipment.

ADMINISTRATIVE IMPLICATIONS

In addition to the increase in construction costs, obstacles to expediting capital project completion are numerous. While facility repairs are a major concern, the ratio of project management compared with the number of major projects are not adequate to address the needs in a timely manner.

For example, the River Stewardship Program provides the needed match for federal Clean Water Act grants and ensures New Mexico continues to receive these funds. Programs under the act support approximately 48 employees in NMED's water protection programs, but STB proceeds cannot be used to pay indirect costs such as for administration.

CONFLICT, DUPLICATION, COMPANIONSHIP, RELATIONSHIP

This bill relates to items in Section 10 of HB2/HAFCS/aSFC, awaiting final approval by the House and Senate. The bill contains various amounts to various state agencies for capital projects and other state funding needs.

OTHER SUBSTANTIVE ISSUES

As in past years, funding requests for state and local infrastructure needs are far greater than available capacity. For 2022, state agency requests total \$791.3 million and local priority capital requests total nearly \$1.8 billion. The proposed projects and funding for state agency facilities in this bill are based on criteria, site visits, review of infrastructure capital improvement plans, monthly meetings with major departments, and testimony at hearings held in the interim. The funding for state agencies reflects the most critical projects impacting public health and safety and ongoing projects requiring additional funds to complete. The proposed funding will address fire and environmental codes, Americans with Disabilities Act regulations, and other licensing and certification requirements that could mean significant additional operating costs to the state if funding is delayed. Addressing the most critical infrastructure projects listed in the bill will significantly reduce operating expenses.

A large portion of funding for agencies in this bill is for facilities under the authority of the General Services Department, Facilities Management Division. The division is responsible for the repairs and maintenance of 6.9 million square feet of space in 750 buildings throughout the state, including hospitals, prisons, juvenile facilities, state police district offices, and other office space serving the public.

Consecutive years of nonrecurring revenues has helped reduce the deferred maintenance backlog of infrastructure statewide, but there are still significant needs in critical areas, including drinking water, wastewater, health, transportation, digital connectivity, and economic development.
