**SECTION III: NARRATIVE**

**BILL SUMMARY**

Synopsis:

HM054 seeks to address growing concerns about public school safety in New Mexico by requesting a study on the potential benefits of establishing a statewide school safety entity. This entity could be a department, division, or bureau dedicated to developing and maintaining a comprehensive statewide public school safety plan. The memorial cites several key reasons for the study. School safety concerns have increased due to violent incidents in public schools. Some New Mexico school districts have already implemented security measures such as AI-powered gun detection and anonymous reporting tools. In 2023 House Bill 505 allocated \$35 million dollars for school security infrastructure, but more funding is needed. Other states, such as Indiana and Colorado, have established centralized school safety entities. The study aims to explore the potential benefits of establishing a dedicated statewide school safety entity to standardize and improve security measures. The findings will be reported to the governor and the New Mexico Legislative Council.

NMPSIA does not foresee any financial implications.

**SIGNIFICANT ISSUES**

**PERFORMANCE IMPLICATIONS**

“School Safety” is a broad term that encompasses a wide range of areas that should be addressed under the umbrella of keeping students safe. Violence in schools perpetrated by adults and students is an urgent issue which should include a review and development of programs and policies to include violent students in classrooms, sexual molestation- Staff on student and student on student and hazing to name a few. The NM Public School Insurance Authority has a great deal of data that can be shared with the committee and therefore would request membership on the committee.
