SECTION III: NARRATIVE

BILL SUMMARY

Synopsis:

SB59 proposes to include off-site fabricator as a defined term in the Public Works Act to mean, a person who earns a wage to fabricate heating, cooling, ventilation or exhaust duct systems (HVAC Systems) that are part of a public works project or any other fabrication that is either a component or structure that is prefabricated to specifications for use in or on a public works project. Mechanics and off-site fabricators shall be paid to pursuant to the established wages and benefits.

FISCAL IMPLICATIONS

The financial implications of this legislation remain uncertain, as accurately assessing the fiscal effects on the Public School Capital Outlay Fund (PSCOF) proves challenging. This difficulty arises from the fact that the Public School Facilities Authority (PSFA) does not monitor the number of off-site fabricators involved in its HVAC components included in Standard or

System-based projects. Consequently, the PSFA is unable to estimate the potential rise in costs linked to evaluating wage rates and benefits for off-site fabricators in future HVAC System projects.
