

Since 1999

Las Cruces, New Mexico

The Mesilla Valley Maze began in 1999, an extension of a commercial farming operation in the Mesilla Valley of New Mexico. Looking to welcome the local community to a day in the country, the Maze and Pumpkin Patch is able to give people the opportunity to reconnect with their rural roots.

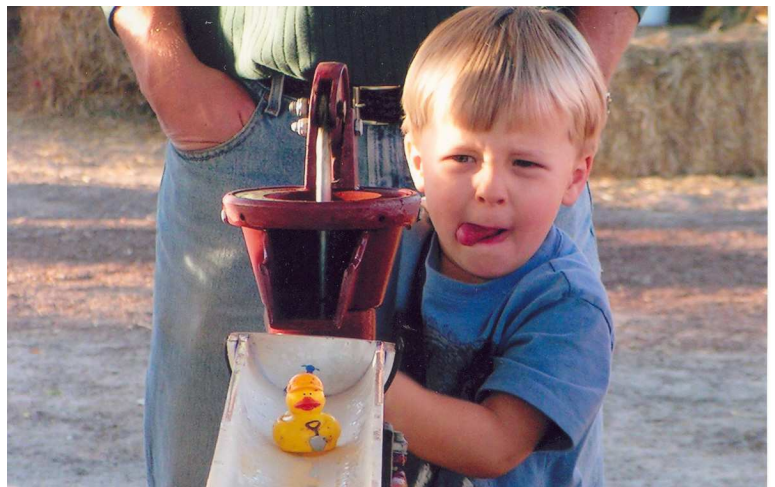

We are proud of the investment we have made in this venture for it enhances education, contributes to many worthwhile organizations, and gives us the chance to share the story of modern agriculture.

“A-Maze-in” America

With a focus on Fun and Ag based activities, our Agri-Tourism venture is an autumn weekend destination for families within a 100 mile radius.

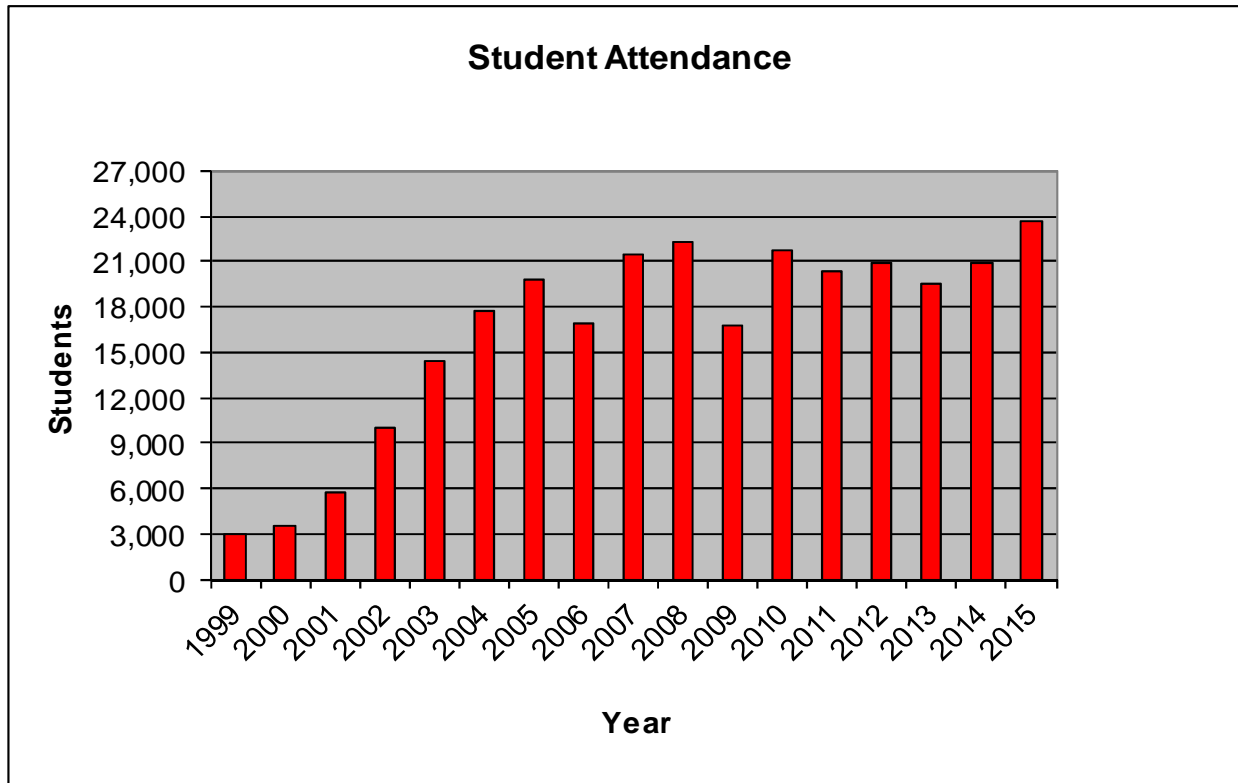

Since 1999, we have been inviting our community to our farm, in order to enjoy the outdoors and give parents the chance to re-experience fond farm memories with their children.

We began with weekend visits and have expanded with Festivals and Award Winning Educational Field Trips.

Over the past 17 seasons, we have been an educational host to more than 275,000 students.

Our Education Program meets Benchmarks and Common Core Standards for Kindergarten through 5th grade, both New Mexico and Texas.

Our education program has been recognized as the **“Best Ag Based Field Trip in North America”** and also **“New Mexico’s Ag Educator of the Year”**

Students will travel on a bus up to 2 hours to get to the Mesilla Valley Maze. We host schools from 17 districts, 2 states, and 2 countries; teachers are now bringing school groups from Juarez, Mexico.

In order to keep the Maze fully operational, we have a staff of over 90 seasonal people; with 6 people working year 'round.

Our staff members are like a part of our family, and even though the jobs are seasonal, we have about an 80% return rate from year to year.

More and more land owners are turning to Agri-tourism as a way to increase the viability of their family farms and ranches; with the motivation to save their rural heritage for the next generation.

We love what we do, and realize the importance of sharing the message of modern agriculture with our Urban neighbors.
