

Current New Mexico Insurance Enrollment by Category

Notes: Medicare enrollment estimated from 2012 Medicare enrollment data from CMS with a growth factor applied based on growth of the over-65 population in New Mexico from the American Community Survey through the U.S. Census Bureau. Medicaid enrollment is as of September 2015. IBAC enrollment is as of August 2015, with Medicare supplement enrollees deducted to avoid double counting. Commercially insured enrollment data is as of September 2015. Self-funded employer enrollment data estimated from WSD employment data assuming companies with more than 1,000 employees are 100 percent self-funded with an average coverage plan of 2.8 people per employee. Employers with less than 1,000 employees were assumed to be 20 percent self-funded with an average coverage plan of 1 person per employee. NMHIX individual coverage data as of June 2015 and small group coverage data as of September 2015. Undocumented population estimate is as of April 2015. Uninsured estimates from 2014 survey data. Unidentified uninsured total determined after all other categories considered.
