TOBACCO SETTLEMENT REVENUE OVERSIGHT C O M M I T T E E

Co-Chaired by: Senator Cisco McSorley Representative John L. Zimmerman

Richard S. Larson, MD, PhD

Executive Vice Chancellor Vice Chancellor for Research

UNM Health Sciences Center plays a critical role in delivering healthcare services, training of health professionals, and contributing to New Mexico's economy.

Employs over **10,000** individuals

UNM HSC:

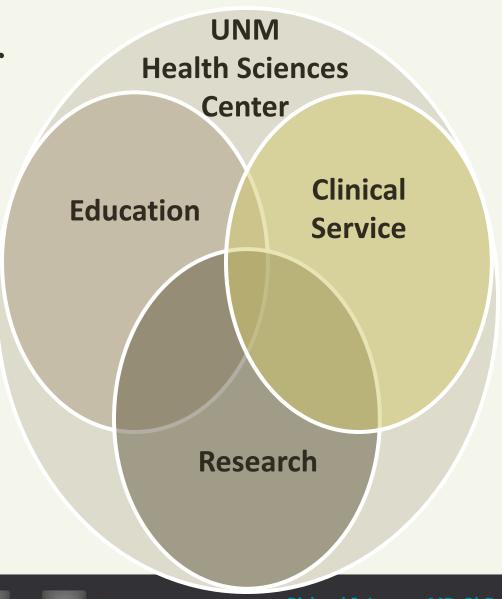

An Academic Health Center

Neither purely academic institution or health care providers

Compete in **health** and **marketplace**

Engage in biomedical research

Extensive educational activities

UNM HSC:

Critical Needs Programs for New Mexico

Patient Care
Delivery of comprehensive
and unique patient care

Education

Growing the **next generation** of Health Care Professionals Workforce

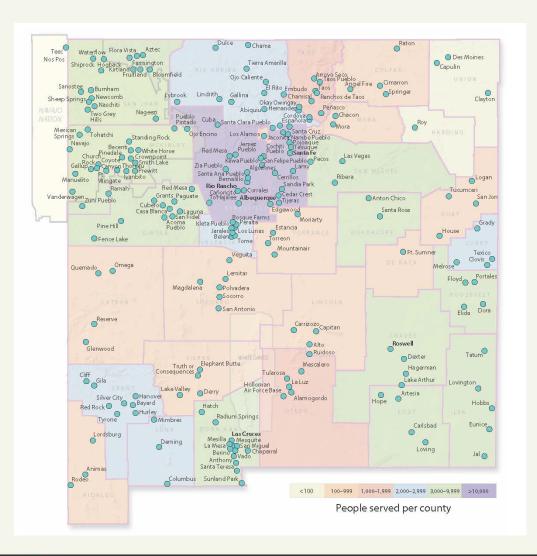

Research

Creating new **knowledge** to increase the **quality of life** for New Mexicans

Activities in New Mexico Counties

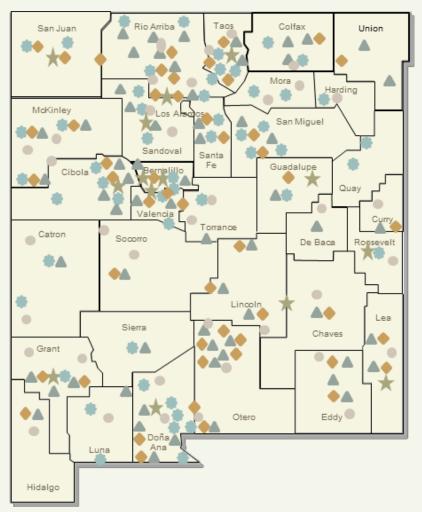

579 Activities in 246 Communities Activities include:

- Education
- Patient care
- Community research
- Telehealth sites

Research in New Mexico Counties

- Provides statewide support services for research
 - ★ Health Extension Rural Offices (HEROs)
 - Investigator-led community-based programs
- Provides access to other research programs
 - Project ECHO
 - Practice-based research network
- Establishing recruitment network
 - CHS/CHW Network

Tobacco Settlement Statute

- Supports clinical care, education, and research into tobacco related Illnesses
- Support of biomedical research with tobacco settlement funds
- Funded other needed health-related programs

Cigarette Tax vs. Tobacco Settlement

- Tobacco Settlement supports tobacco-related research and clinical care at the entire UNM HSC
- Cigarette Tax (0.83%) supports clinical care, education, and research at the UNM Cancer Center

Tobacco Related Illnesses

Cancer

- Lung Cancer
- Esophagus Cancer
- Laryngeal Cancer
- Kidney Cancer
- Cervical Cancer
- Colorectal Cancer
- Leukemia/Lymphoma

Brain & Behavioral Illnesses

- Addiction
- Fertility in Women
- Impotence in Men
- SIDS
- Toxic Exposures

Infectious Disease and Immunity

- Osteoporosis
- Delayed wound bleeding
- Palmoplantar pustulosis
- Psoriasis
- Increased incidence of back injury and broken bones

Diabetes and Vascular Diseases

- Coronary Heart Disease
- High Cholesterol
- Stroke
- Diabetes
- Emphysema
- Asthma
- Atherosclerosis

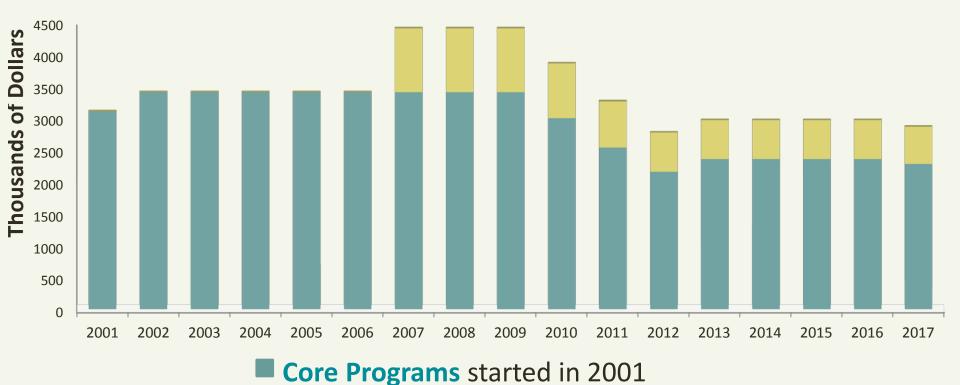

Changes Over the Last Decade

■ Instruction & General funding in 2007

Programs Supported by Tobacco Settlement Funds

Core Projects

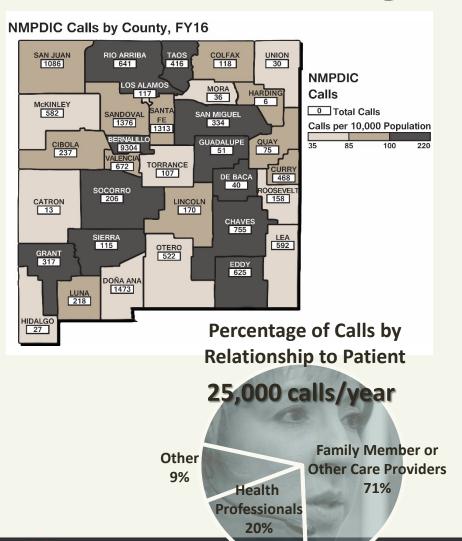

- NM Poison & Drug Information Center (FY18 Request: \$590,300)
- Pediatric Oncology Program (FY18 Request: \$250,000)
- UNM HSC Biomedical Research (Genomics, Biocomputing & Environmental Health Research) (FY18 Request: \$937,200)

Instruction & General (I&G) Funds

- Specialty Education Trauma (FY18 Request: \$250,000)
- Specialty Education Pediatrics (FY18 Request: \$250,000)
- Instruction and General Line Item (added in 2007) (FY18 Request: \$581,600)

NM Poison & Drug Information Center

Benefit

- The only poison center in New Mexico
- Improves New Mexicans' health by reducing morbidity and mortality associated with poisoning and by encouraging proper use of medications
- Reduces healthcare costs by helping citizens identify when to safely be treated at home and by consulting with healthcare teams for hospitalized patients
- Reducing hospitalizations saved ~\$36M
- Receives more than 25,000 calls per year
- Provides professional education statewide

Pediatric Oncology Program

Benefit

- The center of excellence for diagnosis & care of children with cancer
- The only provider of tertiary care for children with cancer in New Mexico
- Consults on young adults with pediatric cancers

Over 450 active patients with 4,900 visits

Use of Funds

- Provides support to patients and their families via counseling
- Faculty positions are supported as well

History of I&G Funding from Tobacco Settlement Funds

- Began in 2007
- Legislature funded HSC I&G General Fund requests from TSF
- Supports trauma care, primary care, and faculty retention

With faculty compensation rates below the national average, the School of Medicine (SOM) is having difficulty retaining faculty physicians due to salary compaction. The SOM must be able to hire and retain quality faculty physicians as they are the key to educating our medical students, while simultaneously providing care to New Mexicans.

Funds Committed to I&G Supplement

Benefit

- Support additional faculty positions in pediatrics and trauma medicine
- Ensure that faculty members have sufficient time to continue teaching despite and ever-increasing clinical patient load

Programs

- Specialty Education in Pediatrics
- Specialty Education in Trauma HSC
- I&G Support for Education and Retention

UNM HSC Biomedical Research Genomics & Environmental Health

Benefit

- Pilot funds
- "Core" support
- Accelerating the translation of basic research into clinical practice

FY18 Request: \$937,200

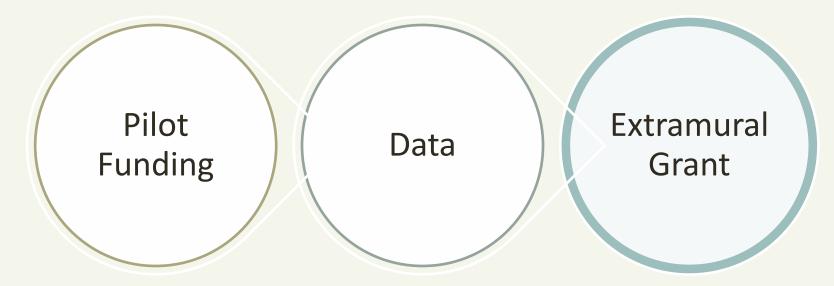

(Now known as UNM Comprehensive Program for Clinical and Basic Research, and Prevention of Tobacco-Related Illnesses in New Mexico)

Pilot Funding

 Pilot funding is the primary mechanism for obtaining federal support

Pilot funding returns \$8 – \$20 per \$1 invested.

Example of Pilot Funding

- Idea
 - Can we develop a handheld device to rapidly diagnose disease?
- Required Investment
 - \$50K Pilot funds (2003)
 - Core facilities supported by Tobacco Settlement
- Result
 - Initial data obtained with Sandia National Laboratories
 - Grant application (\$1.3M for 8yr; supports 10 jobs/yr)
- Chief Scientist Award from the Defense Intelligence Agency
- Public-Private Partnership
 - Adapted for hepatitis B and C, HIV, sin nombre virus, anthrax
 - Potential to save tens of thousands of lives

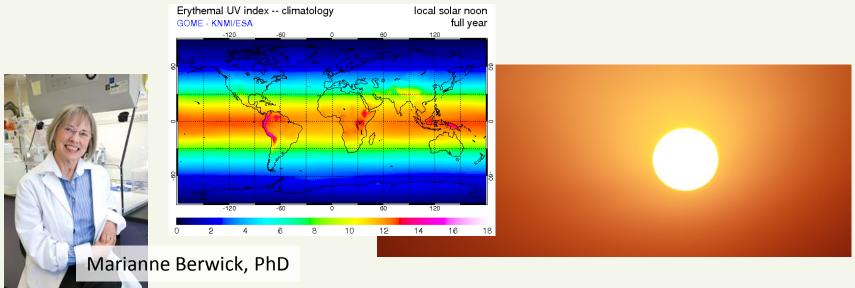

Ultraviolet Light and Immunosuppression in Melanoma

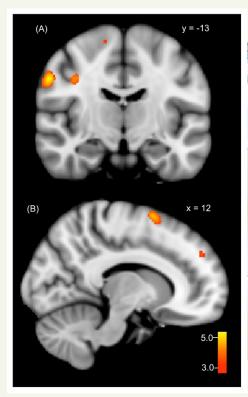

Vitamin D's role regulating the immune system may be a key to understanding melanoma.

Dr. Berwick and her collaborators will examine UV exposure, vitamin D status, and immune response markers in melanoma patients to understand how the immune system might be harnessed to fight the disease.

Neurocognition in PTSD

A greater understanding of PTSD is urgently needed.

Dr. Bustillo and his team will use brain imaging to understand how differences in regulating emotions and brain function are related to posttraumatic stress disorder and substance use problems.

BPA and **Breast Cancer Risk**

An estrogen receptor, GPER, may play a role in breast cancer risk following BPA exposure.

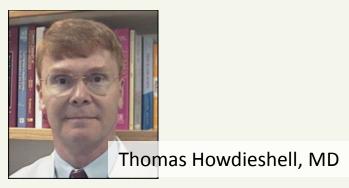

Helen Hathaway, PhD

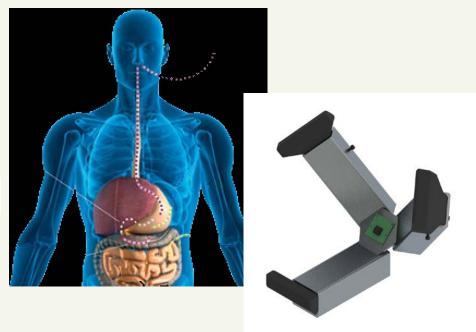

In animals, exposure to bisphenol A (BPA) around the time of birth increases breast cancer risk. To find out how, Dr. Hathaway and her team are investigating the cellular action of GPER, an estrogen receptor, in breast cancers driven by chemicals like BPA.

Innovation in Feeding Tube Visualization

In the ICU, rapid and accurate placement of a feeding tube can mean life or death.

Dr. Howdieshell and his collaborators will develop 3D imaging technology that takes advantage of the metal tip on nasogastric feeding tubes currently in use. Their new device will allow medical professionals to see the tube's position in real time without harmful ionizing radiation.

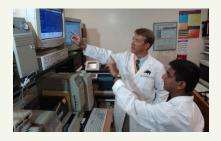

Core Facilities

- Shared facilities that provide service to entire HSC community (genomics and biostatistics)
- Provide access to equipment that is otherwise unavailable
 - Research that would otherwise be impossible

Core Facilities: Biostatistics

- Biostatistics is an exciting field where mathematics, computer science, and computational biology are applied to biological problems, public health and medicine.
- Biostatisticians design, conduct and analysis of research studies and develop new methods to address emerging problems.
- Biostatistics helps researchers, clinicians and public health experts make sense of all the data collected to decide whether a treatment is working or to find factors that contribute to diseases.

Clinical and Intervention Trials

- Brings latest treatments and technologies to New Mexico
- If trial not available, treatment not available in New Mexico
- Each trial provides new treatment at no cost to patient
- Tobacco settlement funding has provided infrastructure support to 181 trials and 93 investigators

Examples in Clinical Trials Center

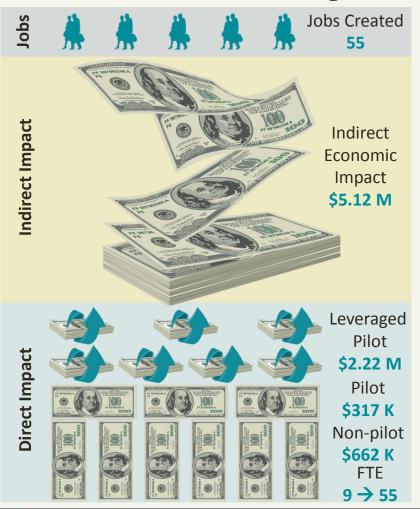

- 12 studies involving cystic fibrosis
- 24 studies involving heart/cardiovascular
- 35 studies involving diabetes
- 11 studies involving infectious disease
- 14 studies involving asthma
- 2 studies involving vitamins and their role in cardiovascular disease

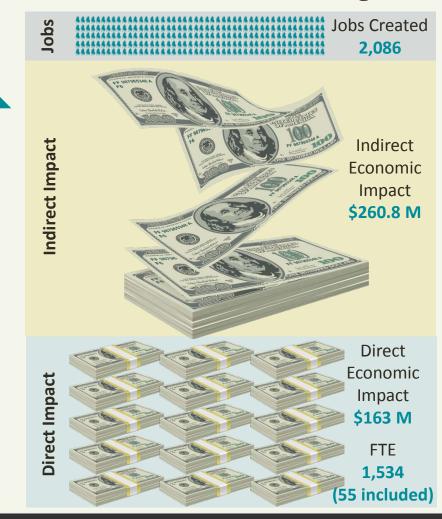

Economic Impact

Tobacco Settlement Funding

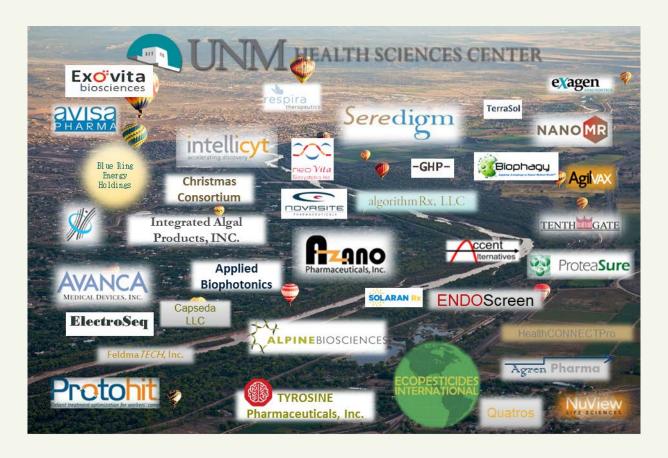

Total Research Funding

Commercialization

 Since 2004, 38 new private companies were either spun off from the university or used university technology to start up.

Threats to the

Tobacco Settlement Fund

- Legal challenges by manufacturers
 - NM found "not diligent" by arbitration panel for 2003, reducing settlement by \$39 million
- Fund sustainability
- In the face of these, the HSC highly values efforts by our legislators to build and maintain permanent fund reserves

What Loss of Tobacco Settlement Means to New Mexico

- Risk of pending litigation
- Loss of patient care services
- Loss of technology to provide services and conduct research

- Loss of jobs (leveraged)
- Loss of economic activity
- Progressive shift to general fund

FY18

Tobacco Settlement Request

Tobacco Settlement Funds	FY17	FY18
	Amount	Request
HSC Instruction & General	581,600	581,600
Research in Genomics and Environmental Health	937,200	937,200
Pediatric Oncology	250,000	250,000
New Mexico Poison & Drug Information Center	590,300	590,300
Specialty Education in Trauma	250,000	250,000
Specialty Education in Pediatrics	250,000	250,000
Total	2,859,100	2,859,100

Questions?

E-Cigarettes

Not a Healthy Alternative

- Not a smoking cessation device
 - Risk of addiction for those who don't already smoke
 - Continuation of addiction for smokers
 - Majority of e-cigarette users continue to smoke cigarettes
- Complete health effects unknown
 - Lack of regulation compared to traditional nicotine replacement
 - E-Liquid contains known carcinogens
 - Unknown long-term effects from inhalation of carrier liquid (propylene glycol, glycerine, polyethylene glycol)
- Other risks
 - E-Liquid toxicity
 - Exposure to e-liquid makes up an increasing proportion of nicotine-related calls to poison centers
 - E-Liquid exposures associated with adverse health effects more often than cigarettes
 - Containers required to be child-proof by federal Child Nicotine Poisoning Prevention Act of 2015
