9 10	AN ACT
10	
12	MAKING GENERAL APPROPRIATIONS AND AUTHORIZING EXPENDITURES BY STATE AGENCIES REQUIRED BY LAW
12	BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF NEW MEXICO:
	Section 1. SHORT TITLEThis act may be cited as the "General Appropriation Act of 2002".
14	Section 2. <b>DEFINITIONS</b> As used in the General Appropriation Act of 2002:
15	A. "agency" means an office, department, agency, institution, board, bureau, commission,
16	court, district attorney, council or committee of state government;
17	B. "efficiency" means the measure of the degree to which services are efficient and
18	productive and which is often expressed in terms of dollars or time per unit of output;
19	C. "expenditures" means costs, expenses, encumbrances and other financing uses, other than
20	refunds authorized by law, recognized in accordance with generally accepted accounting principles for the
21	legally authorized budget amounts and budget period;
22	D. "explanatory" means information that can help users to understand reported performance
23	measures and to evaluate the significance of underlying factors that may have affected the reported
24	information;
25	E. "federal funds" means any payments by the United States government to state government or

agencies except those payments made in accordance with the federal Mineral Lands Leasing Act;

"full-time equivalent" or "FTE" means one or more authorized positions that together F. receive compensation for not more than two thousand eighty-eight hours worked in fiscal year 2003. The calculation of hours worked includes compensated absences but does not include overtime, compensatory time or sick leave paid pursuant to Section 10-7-10 NMSA 1978;

G. "general fund" means that fund created by Section 6-4-2 NMSA 1978 and includes federal Mineral Lands Leasing Act receipts and those payments made in accordance with federal block grants and the federal Workforce Investment Act, but excludes the general fund operating reserve and the appropriation contingency fund;

10 "interagency transfers" means revenue, other than internal service funds, legally H. transferred from one agency to another;

I. "internal service funds" means:

(1) revenue transferred to an agency for the financing of goods or services to another agency on a cost-reimbursement basis; and

(2) unencumbered balances in agency internal service fund accounts appropriated by the General Appropriation Act of 2002;

J. "other state funds" means:

(1) unencumbered, nonreverting balances in agency accounts, other than in internal service funds accounts, appropriated by the General Appropriation Act of 2002;

(2) all revenue available to agencies from sources other than the general fund, internal service funds, interagency transfers and federal funds; and

(3) all revenue, the use of which is restricted by statute or agreement;

"outcome" means the measure of the actual impact or public benefit of a program; K.

"output" means the measure of the volume of work completed, or the level of actual services L. or products delivered by a program;

"performance measure" means a quantitative or qualitative indicator used to assess a M program;

N. "program" means a set of activities undertaken in accordance with a plan of action organized to realize identifiable goals and objectives based on legislative authorization;

"quality" means the measure of the quality of a good or service produced and is often an 0. indicator of the timeliness, reliability or safety of services or products produced by a program,

"revenue" means all money received by an agency from sources external to that agency, net Р. of refunds and other correcting transactions, other than from issue of debt, liquidation of investments or as agent or trustee for other governmental entities or private persons;

"target" means the expected level of performance of a program's performance measures; and Q.

R. "unforeseen federal funds" means a source of federal funds or an increased amount of federal funds that could not have been reasonably anticipated or known during the first extraordinary session of the forty-fifth legislature and, therefore, could not have been requested by an agency or appropriated by the legislature.

Section 3. GENERAL PROVISIONS. --

Amounts set out under column headings are expressed in thousands of dollars. A.

Amounts set out under column headings are appropriated from the source indicated by the **B**. column heading. All amounts set out under the column heading "Internal Service Funds/Interagency Transfers" indicate an intergovernmental transfer and do not represent a portion of total state government appropriations. All information designated as "Totals" or "Subtotals" are provided for information and are not appropriations.

C. Amounts set out in Section 4 of the General Appropriation Act of 2002, or so much as may be necessary, are appropriated from the indicated source for expenditure in fiscal year 2003 for the objects expressed.

> Unencumbered balances in agency accounts remaining at the end of fiscal year 2002 shall D.

revert to the general fund by October 1, 2002, unless otherwise indicated in the General Appropriation Act of 2002 or otherwise provided by law.

E. Unencumbered balances in agency accounts remaining at the end of fiscal year 2003 shall revert to the general fund by October 1, 2003, unless otherwise indicated in the General Appropriation Act of 2002 or otherwise provided by law.

F. The state budget division shall monitor revenue received by agencies from sources other than the general fund and shall reduce the operating budget of any agency whose revenue from such sources is not meeting projections. The state budget division shall notify the legislative finance committee of any operating budget reduced pursuant to this subsection.

G. Except as otherwise specifically stated in the General Appropriation Act of 2002, appropriations are made in that act for the expenditures of agencies and for other purposes as required by existing law for fiscal year 2003. If any other act of the second session or the first extraordinary session of the forty-fifth legislature changes existing law with regard to the name or responsibilities of an agency or the name or purpose of a fund or distribution, the appropriation made in the General Appropriation Act of 2002 shall be transferred from the agency, fund or distribution to which an appropriation has been made as required by existing law to the appropriate agency, fund or distribution provided by the new law.

H. In August, October, December and May of fiscal year 2003, the department of finance and administration, in consultation with the staff of the legislative finance committee and other agencies, shall prepare and present revenue estimates to the legislative finance committee. If these revenue estimates indicate that revenues and transfers to the general fund, excluding transfers to the general fund operating reserve, the appropriation contingency fund or the state-support reserve fund are not expected to meet appropriations from the general fund as of the end of fiscal year 2003, then the department shall present a plan to the legislative finance committee that outlines the methods by which the administration proposes to address the deficit.

Pursuant to Sections 6-3-23 through 6-3-25 NMSA 1978, agencies whose revenue from Ι. unforeseen federal funds, state board of finance loans, revenue appropriated by other acts of the legislature, or gifts, grants, donations, bequests, insurance settlements, refunds, or payments into revolving funds exceeds specifically appropriated amounts may request budget increases from the state budget division. If approved by the state budget division, such money is appropriated. In approving a budget increase from unforeseen federal funds, the director of the state budget division shall advise the legislative finance committee as to the source of the federal funds and the source and amount of any matching funds required.

J. For fiscal year 2003, the number of permanent and term full-time-equivalent positions specified for each agency shows the maximum number of employees intended by the legislature for that agency, unless another provision of the General Appropriation Act of 2002 or another act of the second session or the first extraordinary session of the forty-fifth legislature provides for additional employees.

K. Except for gasoline credit cards used solely for operation of official vehicles and telephone credit cards used solely for official business, none of the appropriations contained in the General Appropriation Act of 2002 may be expended for payment of credit card invoices.

L. To prevent unnecessary spending, expenditures from the General Appropriation Act of 2002 for gasoline for state-owned vehicles at public gasoline service stations shall be made only for self-service gasoline; provided that a state agency head may provide exceptions from the requirement to accommodate disabled persons or for other reasons the public interest may require.

M. When approving operating budgets based on appropriations in the General Appropriation Act of 2002, the state budget division is specifically authorized to approve only those budgets that are in accordance with generally accepted accounting principles for the purpose of properly classifying other financing sources and uses, including interfund, intrafund and interagency transfers.

division, in consultation with the legislative finance committee, each agency for which performance measures are established in this section shall file a report with the state budget division and the legislative finance committee analyzing the agency's performance relative to the performance measures and targets in this section. The reports shall be submitted quarterly for certain performance measures and after the end of fiscal year 2003 for the remaining measures. The state budget division, in consultation with the legislative finance committee, shall develop a list of key performance measures for quarterly reporting. The reports shall compare actual performance for the report period with targeted performance based on the level of funding appropriated. In developing guidelines for the submission of agency performance reports, the state budget division, in consultation with the legislative finance committee, shall establish standards for the reporting of variances between actual and targeted performance levels. The quarterly and year-end reports for the period ending June 30, 2003, shall be filed with the state budget division and the legislative finance committee on or before September 1, 2003.

It is the intent of the legislature to continue to improve implementation of the Accountability in Government Act by emphasizing measures that are meaningful to the public and measures that cross agency lines by including them in the General Appropriation Act of 2002. The legislature expects implementation of the Accountability in Government Act to improve as additional agencies submit performance-based budget requests and as agencies, the department of finance and administration and the legislative finance committee continue to cooperate on the development of programs, performance measures and targets. For those agencies that have already submitted performance-based-program budgets, the legislature expects continued refinement of measures to improve their consistency, reliability and relevance, and continued emphasis on defining and measuring the constituent activities of a program.

Unless explicitly stated otherwise, each of the program measures and the associated targets contained in this section reflect performance to be achieved for fiscal year 2003. In cases where there are no targets for output, outcome, efficiency or quality measures, agencies are expected to develop baseline data for fiscal year 2003 and to propose targets when submitting budget requests for fiscal year 2004.

United States army corps of engineers pursuant to the federal Water Resources Development Act of 1986 provided that no amount of this appropriation shall be expended for any project unless the appropriate acequia system or community ditch has agreed to provide seven and one-half percent of the cost from any source other than the irrigation works construction fund or improvement of the Rio Grande income fund and provided that no more than two hundred fifty thousand dollars (\$250,000) shall be appropriated to any one acequia per fiscal year; (b) two hundred fifty thousand dollars (\$250,000) for planning, design, supervision of construction and construction of approved acequia improvement projects in cooperation with the United States department of agriculture, department of interior, department of the army corps, or other engineers; and (c) one hundred fifty thousand dollars (\$150,000) for the construction, improvement, repair and protection from floods the dams, reservoirs, ditches, flumes and appurtenances of community ditches in the state, provided that not more than sixty thousand dollars (\$60,000) of this appropriation shall be used for any one community ditch. The state engineer may enter into cooperative agreements with the owners or commissioners of ditch associations to ensure that work is done in the most efficient and economical manner and may contract with the federal government or any of its agencies or instrumentalities that provide matching funds or assistance. No state funds other than loans may be used to meet the acequia's twenty percent share of the total cost of the project.

The appropriations to the irrigation works construction program of the state engineer include (a) grants, in such amounts as determined by the interstate stream commission, for construction, improvement, repair and protection from floods the dams, reservoirs, ditches, flumes and appurtenances of community ditches in the state located on Indian land whether pueblo or reservation; (b) one million five hundred thousand dollars (\$1,500,000) for loans to irrigation districts and soil and water conservation districts for re-loan to farmers for implementation of water conservation improvements; and (c) five hundred thousand dollars (\$500,000) for small loans to acequias and community ditches for construction of improvements.

The appropriation to the irrigation works construction program of the state engineer includes one

state department of public education for adult basic education, one million two hundred thousand dollars (\$1,200,000) to the commission on the status of women for the teamworks program, two million dollars (\$2,000,000) to the children, youth and families department for adult protective services, twenty-nine million dollars (\$29,000,000) to the children, youth and families department for child-care programs, five hundred thousand dollars (\$500,000) to the children, youth and families department for child-care training services and one million dollars (\$1,000,000) to the department of health for substance abuse.

The three million dollars (\$3,000,000) from the federal funds appropriation for full-day kindergarten slots shall only be used for temporary assistance for needy families eligible students. This appropriation is sufficient to fund temporary assistance for needy families full-day kindergarten slots at the 2002-2003 school year unit value that shall be allocated to school districts. Eligibility determination for the kindergarten slots shall coincide with eligibility for the free or reduced school lunch program. These funds shall be transferred to the state department of public education, identified separately and used only for temporary assistance for needy families eligibles.

The general fund appropriations to the income support program of the human services department include five million dollars (\$5,000,000) for general assistance.

The human services department shall provide the department of finance and administration and the legislative finance committee quarterly reports on the expenditures of the federal temporary assistance for needy families block grant and the state maintenance-of-effort expenditures.

The general fund appropriation to the state department of public education in the personal services and employee benefits category includes sufficient funds for two permanent FTE for the agriculture program located in Las Cruces.

The state board of education is directed to evaluate funds appropriated to New Mexico under the 2001 reauthorization of the federal Elementary and Secondary Education Act, "No Child Left Behind", to determine how the federal initiatives align with legislative initiatives and identify how those federal funds can be used in conjunction with state funds to enhance state appropriations for the state department

On approval of the commission on higher education, the state budget division of the department of finance and administration may approve increases in budgets of agencies, in this section, with the exception of the policy development and institutional financial oversight program of the commission on higher education, whose other state funds exceed amounts specified. In approving budget increases, the director of the state budget division shall advise the legislature through its officers and appropriate committees, in writing, of the justification for the approval.

Except as otherwise provided, any unexpended or unencumbered balance remaining at the end of fiscal year 2003 shall not revert to the general fund.

## COMMISSION ON HIGHER EDUCATION:

(1) Policy development and institutional financial oversight:

The purpose of the policy development and institutional financial oversight program is to provide a continuous process of statewide planning and oversight within the commission's statutory authority for the higher education partners, to ensure both the efficient use of state resources and progress in implementing the public agenda.

The rate of distribution of the state equalization guarantee distribution shall be based on a program unit value determined by the superintendent of public instruction. The superintendent of public instruction shall establish a preliminary unit value to establish budgets for the 2002-2003 school year; and then upon verification of the number of units statewide for fiscal year 2003 but no later than January 31, the superintendent of public instruction may adjust the program unit value.

For the 2002-2003 school year, the state equalization guarantee contains sufficient funding for districts implementing a formula-based program for the first time. Those districts shall use current year MEM in the calculation of program units for the new formula-based program.

The general fund appropriation in the state equalization guarantee distribution reflects the deduction of federal revenue pursuant to Paragraph (2) of Subsection C of Section 22-8-25 NMSA 1978 that includes payments commonly known as "impact aid funds" pursuant to 20 USCA 7701 et. seq., formerly known as "PL 874 funds".

The general fund appropriation to the public school fund shall be reduced by the amounts transferred

### Section 9. CERTAIN FISCAL YEAR 2003 BUDGET ADJUSTMENTS AUTHORIZED. --

A. As used in this section:

 (1) "budget category" means an item or an aggregation of related items that represents the object of an appropriation. Budget categories include personal services and employee benefits, contractual services, other and other financing uses;

(2) "budget increase" means an approved increase in expenditures by an agency from a specific source;

 (3) "category transfer" means an approved transfer of funds from one budget category to another budget category, provided that a category transfer does not include a transfer of funds between divisions;

(4) "program transfer" means an approved transfer of funds from one program of an

agency to another program of that agency; and

(5) "federal funds" means any payments by the United States government to state government or agencies except those payments made in accordance with the federal Mineral Lands Leasing Act and except those payments made in accordance with the federal temporary assistance for needy families block grant and the federal Workforce Investment Act of 1998.

B. Pursuant to Sections 6-3-23 through 6-3-25 NMSA 1978, those budgets adjustments specified in this section are authorized for fiscal year 2003.

C. In addition to the specific category transfers authorized in Subsection F of this section, all agencies, including legislative agencies, may request category transfers among personal services and employee benefits, other and other financing uses.

D. Unless a conflicting budget increase is authorized in Subsection F of this section, an agency with internal service funds/interagency transfers appropriations or other state funds appropriations that collects money in excess of those appropriated may request budget increases in an amount not to exceed four percent of its internal service funds/interagency transfers or other state funds appropriation contained in Section 4 of the General Appropriation Act of 2002. In order to track the four percent transfer limitation, agencies shall report cumulative budget adjustment request totals on each budget adjustment request submitted. The department of finance and administration shall certify agency reporting of these cumulative totals.

E. The taxation and revenue department, human services department, department of health, children, youth and families department, corrections department and department of public safety may request program transfers if:

(1) the cumulative effect of a requested program transfer, together with all program transfers previously requested and approved pursuant to this subsection, will not increase or decrease the total annual appropriation to a program from any funding source by more than five percent; and

(2) for a request made prior to January 1, 2003, the cumulative effect of the requested
