legislative finance committee on or before September 1, 2003.

It is the intent of the legislature to continue to improve implementation of the Accountability in Government Act by emphasizing measures that are meaningful to the public and measures that cross agency lines by including them in the General Appropriation Act of 2003. The legislature expects implementation of the Accountability in Government Act to improve as additional agencies submit performance-based budget requests and as agencies, the department of finance and administration and the legislative finance committee continue to cooperate on the development of programs, performance measures and targets. For those agencies that have already submitted performance-based-program budgets, the legislature expects continued refinement of measures to improve their consistency, reliability and relevance, and continued emphasis on defining and measuring the constituent activities of a program.

Unless explicitly stated otherwise, each of the program measures and the associated targets contained in this section reflect performance to be achieved for fiscal year 2003. In cases where there are no targets for output, outcome, efficiency or quality measures, agencies are expected to develop baseline data for fiscal year 2003 and to propose targets when submitting budget requests for fiscal year 2004.

In concert with the annual agency strategic planning process required by the state budget division, the state budget division shall require the state agency on aging, human services department, labor department, department of health, and the children, youth and families department to coordinate their strategic plans, including internal and external assessments and development of programs and performance measures.
