1	HOUSE BILL 7
2	47TH LEGISLATURE - STATE OF NEW MEXICO - SECOND SESSION, 2006
3	INTRODUCED BY
4	Luci ano "Lucky" Varel a
5	
6	
7	
8	
9	
10	AN ACT
11	MAKING GENERAL APPROPRIATIONS AND AUTHORIZING EXPENDITURES BY STATE AGENCIES REQUIRED BY LAW.
12	BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF NEW MEXICO:
13	Section 1. SHORT TITLE This act may be cited as the "General Appropriation Act of 2006".
14	Section 2. DEFINITIONS As used in the General Appropriation Act of 2006:
15	A. "agency" means an office, department, agency, institution, board, bureau, commission,
16	court, district attorney, council or committee of state government;
17	B. "efficiency" means the measure of the degree to which services are efficient and
18	productive and is often expressed in terms of dollars or time per unit of output;
19	C. "explanatory" means information that can help users to understand reported performance
20	measures and to evaluate the significance of underlying factors that may have affected the reported
21	information;
22	D. "federal funds" means any payments by the United States government to state government or
23	agencies except those payments made in accordance with the federal Mineral Lands Leasing Act;
24	E. "full-time equivalent" or "FTE" means one or more authorized positions that alone or
25	together receives or receive compensation for not more than two thousand eighty hours worked in fiscal

20

- year 2007. The calculation of hours worked includes compensated absences but does not include overtime, compensatory time or sick leave paid pursuant to Section 10-7-10 NMSA 1978;
 - F. "general fund" means that fund created by Section 6-4-2 NMSA 1978 and includes federal Mineral Lands Leasing Act receipts and those payments made in accordance with the federal block grant and the federal Workforce Investment Act, but excludes the general fund operating reserve, the appropriation contingency fund, the tax stabilization reserve and any other fund, reserve or account from which general appropriations are restricted by law;
 - G. "interagency transfers" means revenue, other than internal service funds, legally transferred from one agency to another;
 - H. "internal service funds" means:
 - (1) revenue transferred to an agency for the financing of goods or services to another agency on a cost-reimbursement basis; and
 - (2) unencumbered balances in agency internal service fund accounts appropriated by the General Appropriation Act of 2006;
 - I. "other state funds" means:
 - (1) unencumbered, nonreverting balances in agency accounts, other than in internal service funds accounts, appropriated by the General Appropriation Act of 2006;
 - (2) all revenue available to agencies from sources other than the general fund, internal service funds, interagency transfers and federal funds; and
 - (3) all revenue, the use of which is restricted by statute or agreement;
 - J. "outcome" means the measure of the actual impact or public benefit of a program,
 - K. "output" means the measure of the volume of work completed or the level of actual services or products delivered by a program;
 - L. "performance measure" means a quantitative or qualitative indicator used to assess a program;

- M "quality" means the measure of the quality of a good or service produced and is often an indicator of the timeliness, reliability or safety of services or products produced by a program;
- N. "revenue" means all money received by an agency from sources external to that agency, net of refunds and other correcting transactions, other than from issue of debt, liquidation of investments or as agent or trustee for other governmental entities or private persons; and
 - 0. "target" means the expected level of performance of a program's performance measures. Section 3. **GENERAL PROVISIONS**. --
 - A. Amounts set out under column headings are expressed in thousands of dollars.
- B. Amounts set out under column headings are appropriated from the source indicated by the column heading. All amounts set out under the column heading "Internal Service Funds/Interagency Transfers" are intergovernmental transfers and do not represent a portion of total state government appropriations. All information designated as "Total" or "Subtotal" is provided for information and amounts are not appropriations.
- C. Amounts set out in Section 4 of the General Appropriation Act of 2006, or so much as may be necessary, are appropriated from the indicated source for expenditure in fiscal year 2007 for the objects expressed.
- D. Unencumbered balances in agency accounts remaining at the end of fiscal year 2006 shall revert to the general fund by October 1, 2006, unless otherwise indicated in the General Appropriation Act of 2006 or otherwise provided by law.
- E. Unencumbered balances in agency accounts remaining at the end of fiscal year 2007 shall revert to the general fund by October 1, 2007, unless otherwise indicated in the General Appropriation Act of 2006 or otherwise provided by law.
- F. The state budget division shall monitor revenue received by agencies from sources other than the general fund and shall reduce the operating budget of any agency whose revenue from such sources is not meeting projections. The state budget division shall notify the legislative finance committee of

any operating budget reduced pursuant to this subsection.

- G. Except as otherwise specifically stated in the General Appropriation Act of 2006, appropriations are made in that act for the expenditures of agencies and for other purposes as required by existing law for fiscal year 2007. If any other act of the second session of the forty-seventh legislature changes existing law with regard to the name or responsibilities of an agency or the name or purpose of a fund or distribution, the appropriation made in the General Appropriation Act of 2006 shall be transferred from the agency, fund or distribution to which an appropriation has been made as required by existing law to the appropriate agency, fund or distribution provided by the new law.
- H. The department of finance and administration will regularly consult with the legislative finance committee staff to compare fiscal year 2007 revenue collections with the revenue estimate. If the analyses indicate that revenues and transfers to the general fund are not expected to meet appropriations, then the department shall present a plan to the legislative finance committee that outlines the methods by which the administration proposes to address the deficit.
- I. Pursuant to Sections 6-3-23 through 6-3-25 NMSA 1978, agencies whose revenue from state board of finance loans, from revenue appropriated by other acts of the legislature, or from gifts, grants, donations, bequests, insurance settlements, refunds or payments into revolving funds exceeds specifically appropriated amounts may request budget increases from the state budget division. If approved by the state budget division, such money is appropriated.
- J. Pursuant to Section 6-4-2 NMSA 1978, federal funds received during fiscal year 2007 and not specifically appropriated shall be subject to future appropriation by the legislature provided, however, that an agency may request a budget increase during fiscal year 2007 from the state budget division if the agency submits documentation to the state budget division and to the legislative finance committee showing that all of the following five requirements have been met:
- (1) the requested budget increase is for federal funds the amount of which could not have been reasonably anticipated or known during the second session of the forty-seventh legislature and,

therefore, could not have been requested by the agency or appropriated by the legislature;

- (2) the federal law authorizing the disbursement of the federal funds to the state requires the funds to be expended for specific programs or specific governmental functions without leaving a policy choice to the state of how the funds are to be expended;
- (3) the state has no discretion as to the programs or governmental functions for which the federal funds will be expended;
- (4) the executive branch has had no input into the selection of the programs or governmental functions for which the federal funds are required to be expended; and
- (5) due to the emergency nature of the purpose of the federal funds or the likelihood that the federal funds will be unavailable in the future, the funds need to be budgeted and expended before the first session of the forty-eighth legislature.
- K. For fiscal year 2007, the number of permanent and term full-time-equivalent positions specified for each agency shows the maximum number of employees intended by the legislature for that agency, unless another provision of the General Appropriation Act of 2006 or another act of the second session of the forty-seventh legislature provides for additional employees.
- L. Except for gasoline credit cards used solely for operation of official vehicles, telephone credit cards used solely for official business and procurement cards used as authorized by Section 6-5-9.1 NMSA 1978, none of the appropriations contained in the General Appropriation Act of 2006 may be expended for payment of agency-issued credit card invoices.
- M To prevent unnecessary spending, expenditures from the General Appropriation Act of 2006 for gasoline for state-owned vehicles at public gasoline service stations shall be made only for self-service gasoline provided that a state agency head may provide exceptions from the requirement to accommodate disabled persons or for other reasons the public interest may require.
- N. For the purpose of administering the General Appropriation Act of 2006, the state of New Mexico shall follow the modified accrual basis of accounting for governmental funds in accordance with the

ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT:

(1) Renewable energy and energy efficiency:

The purpose of the renewable energy and energy efficiency program is to develop and implement clean energy programs in order to decrease per capita energy consumption, utilize New Mexico's substantial renewable energy resources, minimize local, regional and global air emissions, lessen dependence on foreign oil and reduce in-state water demands associated with fossil-fueled electrical generation.

The commissioner of public lands is authorized to hold in suspense amounts received pursuant to agreements entered into for the sale of state royalty interests that, as a result of the sale, became eligible for tax credits under Section 29 of the internal revenue code, above those amounts required by law to be transferred to the land grant permanent fund. The commissioner may expend as much of the money so held in suspense, as well as additional money held in escrow accounts resulting from the sales and money held in fund balance, as is necessary to repurchase the royalty interests pursuant to the agreements.

Funds

The internal services funds/interagency transfers appropriations to the interstate stream compact compliance and water development program of the state engineer include four million eight hundred sixty-three thousand seven hundred dollars (\$4,863,700) from the irrigation works construction fund. Of this amount two million two hundred ninety-eight thousand one hundred dollars (\$2,298,100) is in the contractual services category and two million five hundred sixty-five thousand six hundred dollars (\$2,565,600) is in the other category.

The internal services funds/interagency transfers appropriation to the interstate stream compact compliance and water development program of the state engineer in the contractual service category includes seven hundred eighty-seven thousand four hundred dollars (\$787,400) from the improvement of the Rio Grande income fund.

compliance and water development program of the state engineer includes one hundred thousand dollars (\$100,000) from the game protection fund for Ute dam operation. Any unexpended or unencumbered balance remaining at the end of fiscal year 2007 from this appropriation shall revert to the game protection fund.

Revenue from the sale of water to United States government agencies by New Mexico for the emergency drought water agreement dated April 2003, which expires February 28, 2013, is appropriated to the state engineer for the conservation and recovery of the listed species in the middle Rio Grande basin, including the optimizing of middle Rio Grande conservancy district operations.

The appropriations to the irrigation works construction program of the state engineer include (1) one million nine hundred thousand dollars (\$1,900,000) to match seventeen and one-half percent of the cost of work undertaken by the United States army corps of engineers pursuant to the Federal Water Resources Development Act of 1986, provided that no amount of this appropriation shall be expended for any project unless the appropriate acequia system or community ditch has agreed to provide seven and one-half percent of the cost from any source other than the irrigation works construction fund or improvement of the Rio Grande income fund and provided that no more than two hundred fifty thousand dollars (\$250,000) shall be appropriated to one acequia per fiscal year; (2) two hundred fifty thousand dollars (\$250,000) for planning, design, supervision of construction and construction of approved acequia improvement projects in cooperation with the United States department of agriculture, United States department of the interior, United States department of the army or other engineers; and (3) two hundred fifty thousand dollars (\$250,000) for the construction, improvement, repair and protection from floods of dams, reservoirs, ditches, flumes and appurtenances of community ditches in the state, provided that not more than sixty thousand dollars (\$60,000) of this appropriation shall be used for any one community ditch. The state engineer may enter into cooperative agreements with the owners or commissioners of ditch associations to ensure that the work is done in the most efficient and economical manner and may contract with the federal government or any of its agencies or instrumentalities that provide matching funds or assistance. No state funds other than loans may be used to meet the association's twenty percent share of the total cost

Other Intrnl Svc General State Funds/Inter- Federal Item Fund Funds Agency Trnsf Funds Total/Target

of the project.

The appropriations to the irrigation works construction program of the state engineer include grants, in such amount as determined by the interstate stream commission, for construction, improvement, repair and protection from floods of dams, reservoirs, ditches, flumes and appurtenances of community ditches in the state on Indian land, whether pueblo or reservation.

The interstate stream commission's authority to make loans for irrigation improvements includes five hundred thousand dollars (\$500,000) for loans to acequias, irrigation and conservancy districts. The interstate stream commission's authority also includes five hundred thousand dollars (\$500,000) for loans to irrigation districts, conservancy districts and soil and water conservation districts for re-loan to farmers for implementation of water conservation improvements.

None of the money appropriated to the state engineer for operating or trust purposes shall be expended for primary clearing of vegetation in a phreatophyte removal project, except insofar as is required to meet the terms of the Pecos river compact between Texas and New Mexico. However, this prohibition shall not apply to removal of vegetation incidental to the construction, operation or maintenance for flood control or carriage of water or both.

The general fund and other state funds appropriations to the state engineer in the contractual services category are contingent upon the state engineer including performance measures in its contracts to increase contract oversight and accountability. The appropriations are further contingent on the preparation and presentation of a report on contractors' purposes and performance compliance to the legislative finance committee prior to October 1, 2006.

The general fund appropriations to the medical assistance program of the human services department include sixteen million three hundred thousand dollars (\$16,300,000) fund to provide direct services for the disabled and elderly program and serve one hundred additional clients over the average number served per month for fiscal year 2007. The funds may not be used for any other purpose.

The other state funds appropriation to the medical assistance program of the human services department includes one million three hundred thousand dollars (\$1,300,000) from the tobacco settlement program fund for breast and cervical cancer treatment for uninsured women under age sixty-five identified through the centers for disease control national early detection program. These funds may not be used for any other purpose.

The general fund appropriation to the medical assistance program of the human services department includes three hundred twelve thousand five hundred dollars (\$312,500) to match with federal funds to maximize the graduate medical education and indirect medical education payments through medicaid.

The university of New Mexico hospital state coverage insurance program is authorized to expand up to five thousand (5,000) participants.

Funds

The general fund appropriation to the department of health in the contractual services category in all programs is contingent upon the department including performance measures in its outcome-based contracts to increase oversight and accountability.

Performance measures:

Item

(a) Outcome:	Percent capital project funds expended over a five-year	
	peri od	16%
(b) Output:	Number of repeat audit findings	0

Subtotal [276, 759. 5] [52, 156. 6] [72, 301. 7] [123, 891. 8] 525, 109. 6

DEPARTMENT OF ENVIRONMENT:

(1) Field operations:

The purpose of the field operations program is to protect public health and the environment through specific programs that provide regulatory oversight over food service and food processing facilities, regulation of on-site treatment and disposal of liquid wastes, regulation of public swimming pools and baths; regulation of medical radiation and radiological technologist certification, compliance with the Safe Drinking Water Act; application of the mosquito abatement regulation, oversight of implementation of consent orders at Sandia and Los Alamos national laboratories, oversight of waste isolation pilot plant transportation; and, education and public outreach about radon in homes and public buildings.

policy development and institutional financial oversight program of the higher education department, whose other state funds exceed amounts specified. In approving budget increases, the director of the state budget division shall advise the legislature through its officers and appropriate committees, in writing, of the justification for the approval.

Except as otherwise provided, any unexpended or unencumbered balance remaining at the end of fiscal year 2007 shall not revert to the general fund.

HIGHER EDUCATION DEPARTMENT:

(1) Policy development and institutional financial oversight:

The purpose of the policy development and institutional financial oversight program is to provide a continuous process of statewide planning and oversight within the department's statutory authority for the higher education partners, to ensure both the efficient use of state resources and progress in implementing the public agenda.

Appropri ati ons:

(a)	Personal services and

Authorized FTE: 29.50 Permanent; 5.50 Term

Any unexpended or unencumbered balance in the policy development and institutional financial oversight program of the higher education department remaining at the end of fiscal year 2007 from appropriations made from the general fund shall revert to the general fund.

The general fund appropriation to the policy development and institutional financial oversight program of the higher education department in the other category includes three million dollars (\$3,000,000) for the program development enhancement fund for higher education institutions to address the

Other Intrnl Svc General State Funds/Inter- Federal Item Fund Funds Agency Trnsf Funds Total/Target

state's nursing shortage. In allocating these funds, the higher education department is directed to consider past performance and implementation of new and innovative programs to increase enrollment and accelerate matriculation. Further, the higher education department should annually report appropriate performance measures on outcomes across institutions and across programs designed to address the nursing shortage.

The general fund appropriation to the policy development and institutional financial oversight program of the higher education department in the other category includes five million seven hundred eight thousand one hundred dollars (\$5,708,100) to provide a three-quarter percent increase in the employer contribution to the educational retirement fund to be transferred in fiscal year 2007 to the educational retirement board to provide in advance for the fiscal year 2008 cost of the employer share of contribution increase for higher education employees.

The general fund appropriation to the policy development and institutional financial oversight program of the higher education department in the other category includes three million two hundred twenty-eight thousand one hundred dollars (\$3,228,100) for special projects expansion. For general fund monies provided for special projects expansion, the higher education department shall develop performance criteria and outcomes and report on financial accountability to ensure efficient funding allocation.

By September 1, 2006, the higher education department shall report time series data to the office of the governor, public education department, department of finance and administration and legislative finance committee on performance measures and targets for recruitment, enrollment, retention and graduation rates for Native American and Hispanic students. The higher education department shall provide an action plan by institution to achieve targeted results.

(1) State equalization guarantee distribution:

Appropri ati ons:

2, 121, 877. 4

850. 0

2, 122, 727. 4

The rate of the distribution of the state equalization guarantee distribution shall be based on a program unit value determined by the secretary of the public education department. The secretary of the public education department shall establish a preliminary unit value to establish budgets for the 2006-2007 school year and then, upon verification of the number of units statewide for fiscal year 2007 but no later than January 31, 2007, the secretary of the public education department may adjust the program unit value.

The general fund appropriation for the state equalization guarantee distribution contains sufficient funding to provide an average four and one-half percent salary increase for all teachers, other instructional staff, and other certified staff and noncertified staff, effective July 1, 2006.

The general fund appropriation for the state equalization guarantee distribution includes seven million four hundred ninety-six thousand nine hundred dollars (\$7,496,900) to implement the forty-five thousand dollar (\$45,000) minimum salary for level three-A teachers.

The secretary of the public education department, in collaboration with the department of finance and administration and administration office of educational accountability, shall ensure all level three-A teachers receiving salary increases under the three-tiered minimum salary have been evaluated under the tiered licensure evaluation system and have the professional competencies of level three-A teachers. The secretary of the public education department shall withhold from public school district distribution funding for minimum salaries for any teacher that has not been evaluated.

The general fund appropriation for the state equalization guarantee distribution contains sufficient funding to provide a three-quarter percent increase in the employer contribution to the education retirement fund.

The general fund appropriation to the state equalization guarantee distribution reflects the deduction of federal revenues pursuant to Paragraph (2) of Subsection C of Section 22-8-25 NMSA 1978 that

(d) Outcome:

includes payments commonly known as "impact aid funds" pursuant to 20 USCA 7701 et seq., and formerly known as "PL874 funds". The general fund appropriation to the public school fund shall be reduced by the amounts transferred to the public school fund from the current school fund and from the federal Mineral Lands Leasing Act receipts otherwise unappropriated. Any unexpended or unencumbered balance in the distributions authorized remaining at the end of fiscal year 2007 from appropriations made from the general fund shall revert to the general fund. The appropriation to the instructional materials fund is made from the federal Minerals Land Leasing Act (30 USCA 181, et seq.) receipts. The general fund appropriation to the public education department includes thirteen million five hundred fifty-five thousand dollars (\$13,555,000) to provide a three-quarter percent increase in the employer contribution to the educational retirement fund to be transferred in fiscal year 2007 to the educational retirement board to provide in advance for the fiscal year 2008 cost of the employer share of contribution increases for public education employees. Performance measures: (a) Outcome: Annual percent of stakeholders positively rating their involvement with public elementary, middle and high schools 80% (b) Outcome: Annual percent of core academic subjects taught by highly qualified teachers in pre-kindergarten through twelfth grade 95% (c) Outcome: Percent of school districts and charter schools participating in the national center for education statistics chart of accounts 100%

The commissioner of public lands is authorized to hold in suspense amounts received pursuant to agreements entered into for the sale of state royalty interests that, as a result of the sale, became eligible for tax credits under Section 29 of the internal revenue code, above those amounts required by law to be transferred to the land grant permanent fund. The commissioner may expend as much of the money so held in suspense, as well as additional money held in escrow accounts resulting from the sales and money held in fund balance, as is necessary to repurchase the royalty interests pursuant to the agreements.
