

Fiscal impact reports (FIRs) are prepared by the Legislative Finance Committee (LFC) for standing finance committees of the NM Legislature. The LFC does not assume responsibility for the accuracy of these reports if they are used for other purposes.

Current FIRs (in HTML & Adobe PDF formats) are available on the NM Legislative Website (legis.state.nm.us). Adobe PDF versions include all attachments, whereas HTML versions may not. Previously issued FIRs and attachments may be obtained from the LFC in Suite 101 of the State Capitol Building North.

SUMMARY

Synopsis of Bill

Senate Bill 731 would appropriate \$140,421 to the Department of Health (DOH) from the General Fund to finance six pilot detoxification programs, using acupuncture to treat substance abuse especially in traditionally underserved populations such as women and children of color, at-risk youth, low-income persons, victims of violence and those with concurrent mental health problems. Any unexpended or unencumbered balance remaining at the end of FY08 shall revert to the General Fund.

FISCAL IMPLICATIONS

An appropriation for the purposes of SB 731 is not contained in the Executive Budget Request for the Department of Health.

SIGNIFICANT ISSUES

From DOH

Acupuncture detox (technically called auricular detoxification) is an effective and inexpensive

intervention, which has been proven to be successful in substance use treatment and harm reduction settings nationwide. It is effective in treating drug and alcohol cravings, drug and alcohol withdrawal symptoms, and increasing the overall physical and mental well-being of individuals living with substance use disorders. Auricular detoxification has been studied extensively by Yale University School of Medicine, and research results have been published in such professional journals as The Lancet, American Journal on Addictions, and Journal of Substance Abuse Treatment.

To date, there are fewer than 15 Certified Auricular Detoxification Specialists (CADS) in New Mexico.

DUPLICATION

SB 731 is duplicated by HB 845.

TECHNICAL ISSUES

SB 731 refers to “acupuncture” to treat substance use disorders among traditionally underserved populations. The appropriate characterization of the treatment should be changed to “auricular detoxification treatments,” or “acu-detox.” Acu-detox treatments can be provided by New Mexico Certified Auricular Detoxification Specialists (CADS) or by Licensed Acupuncturists with training.

SB 731 as currently written refers to acupuncture, which may only be provided by Licensed Acupuncturists or Doctors of Oriental Medicine. DOH believes as currently written SB 731 would not allow CADS to provide acu-detox and result in fewer individuals being served by the proposed pilot programs. See suggested amendment below.

AMENDMENTS

On page 1, replace acupuncture with the term auricular detoxification treatments on lines 12 and 20.
