

Fiscal impact reports (FIRs) are prepared by the Legislative Finance Committee (LFC) for standing finance committees of the NM Legislature. The LFC does not assume responsibility for the accuracy of these reports if they are used for other purposes.

Current FIRs (in HTML & Adobe PDF formats) are available on the NM Legislative Website ([www.nmlegis.gov](http://www.nmlegis.gov)). Adobe PDF versions include all attachments, whereas HTML versions may not. Previously issued FIRs and attachments may be obtained from the LFC in Suite 101 of the State Capitol Building North.

## FISCAL IMPACT REPORT

#### Responses Received From

Department of Finance and Administration (DFA)

### SUMMARY

#### Synopsis of Bill

This bill appropriates \$700 thousand from the general fund to the Local Government Division (LGD) of the Department of Finance and Administration (DFA) to provide emergency interim funding for protective custody and social detoxification services in Gallup.

### FISCAL IMPLICATIONS

The appropriation of \$700 thousand contained in this bill is a nonrecurring expense to the general fund; it will allow time to explore more permanent solutions for addressing the need for

detoxification services in the Gallup area. Any unexpended or unencumbered balance remaining at the end of fiscal year 2014 shall revert to the general fund.

### **SIGNIFICANT ISSUES**

The DFA reports that there is a strong need for alcohol detoxification services in the Gallup area. In 2011, there were 19,532 involuntary protective custody admissions to the local Gallup facility providing social detoxification services. In the absence of a detoxification facility, people might otherwise be 1) left in an inebriated state without shelter and unable to ensure their own safety, 2) taken to emergency rooms, or 3) taken into protective custody by local law enforcement agencies.

The local detoxification center has historically provided culturally competent detoxification and treatment services, and for many years received direct contracts with the Indian Health Service (IHS) to sustain its operations. (The majority of the clients receiving detoxification services in the community are Native American.) However, due to changes in federal policies, the HSI no longer contracts directly with local providers. As a result, the local provider has experienced significant revenue reductions in each of the last two years. The annual detoxification services budget for the facility is now \$1.2 million. Other services provided by the local detoxification center are paid for by Optum Health and federal funds, but these funds cannot be used for detoxification services.

In August 2012, the provider of detoxification services in the Gallup area announced that it would be forced to close its facility in February 2013 unless additional funding was secured. In late December 2012, the Navajo Nation committed \$300 thousand in a one-time emergency grant to the facility. The \$700 thousand provided in this bill would enable the DFA/LGD to enter into an agreement with a local government to fund a social detoxification facility for approximately six months and allow time to explore more permanent solutions for addressing the need for detoxification services in the Gallup area.

### **PERFORMANCE IMPLICATIONS**

The DFA/LGD already administers grants for social detoxification services through local governments, and administering this emergency grant would not significantly affect the agency's performance.

### **ADMINISTRATIVE IMPLICATIONS**

The City of Gallup would be required to follow the procurement code in order to contract for detoxification services.

### **AMENDMENTS**

It would be helpful to require an external evaluation of services as part of this legislation, as well as an analysis of the costs and possible funding sources associated with social detoxification services. This information would enable the state and other potential funders to make informed decisions regarding the best way to address the problems of street inebriates in Gallup and McKinley County.

**ALTERNATIVES**

The Gallup community could seek other funding sources for social detoxification services. Alternatives could include both tribal and local governments; however, to date efforts to secure additional funding have not been successful and immediate funding is needed to avoid closure of the only provider of detoxification services in the Gallup area.

**WHAT WILL BE THE CONSEQUENCES OF NOT ENACTING THIS BILL**

If the bill is not passed the Gallup area will likely not have access to needed social detoxification services due to the inability of the local provider to secure funding sources. Inebriated clients who would otherwise receive detoxification services would be left on the streets, taken to jail, or taken to emergency rooms and other health facilities not equipped to provide social detoxification. According to a 1997 report in the Christian Science Monitor, in the 1980s, Gallup averaged 34,000 protective custody admissions to the police drunk tank a year.
