

Fiscal impact reports (FIRs) are prepared by the Legislative Finance Committee (LFC) for standing finance committees of the NM Legislature. The LFC does not assume responsibility for the accuracy of these reports if they are used for other purposes.

Current and previously issued FIRs are available on the NM Legislative Website (www.nmlegis.gov) and may also be obtained from the LFC in Suite 101 of the State Capitol Building North.

SUMMARY

Synopsis of Bill

Senate Memorial 4 requests UNM to devise a plan to create a movement disorders center that is staffed with movement disorders specialists with fellowship training and provides support and allied health care to patients.

FISCAL IMPLICATIONS

Legislative memorials do not carry appropriations. UNM is likely to incur some costs associated with the requests contained in the memorial, such as staff time and supplies in developing the plan to create a movement disorders center. Costs to carry out the plan and create the center are unclear at this time, but they would involve finding appropriate and accessible space, staffing the

center, and administrative overhead costs charged by the university to cover functions such as human resources, accounting, and utilities. Depending on licensure or certification, some of these costs could be recouped if the services provided are billable to Medicaid, Medicare, private insurance, or other programs such as the US Department of Veterans Affairs.

SIGNIFICANT ISSUES

According to data retrieved by HED, 42 million individuals in the U.S. suffer from some form of movement disorder. SM 4 suggests this number is closer to 10 million, and 250 thousand live in New Mexico, comprising 12 percent of the state's population.

HED cites the Mayo Clinic in defining movement disorders as “a group of nervous system (neurological) conditions that cause abnormal increased movements, which may be voluntary or involuntary.” Movement disorders can also cause reduced or slow movements. The Mayo Clinic lists the following common types of movement disorders:

- Ataxia
- Cervical dystonia
- Chorea
- Dystonia
- Functional movement disorder
- Huntington's disease
- Multiple system atrophy
- Myoclonus
- Parkinson's disease
- Parkinsonism
- Progressive supranuclear palsy
- Restless legs syndrome
- Tardive dyskinesia
- Tourette syndrome
- Tremor Wilson's disease
