- 25 Section 3. GENERAL PROVISIONS.--

1 A. Amounts set out under column headings are expressed in thousands of dollars.

- B. Amounts set out under column headings are appropriated from the source indicated by the column heading. All amounts set out under the column heading "Internal Service Funds/Interagency
  Transfers" indicate an intergovernmental transfer and do not represent a portion of total state government appropriations. All information designated as "Totals" or "Subtotals" are provided for information and are not appropriations.
  - C. Amounts set out in Section 4 of the General Appropriation Act of 1999, or so much as may be necessary, are appropriated from the indicated source for expenditure in fiscal year 2000 for the objects expressed.
  - D. Unencumbered balances in agency accounts remaining at the end of fiscal year 1999 shall revert to the general fund by October 1, 1999, unless otherwise indicated in the General Appropriation Act of 1999 or otherwise provided by law.
  - E. Unencumbered balances in agency accounts remaining at the end of fiscal year 2000 shall revert to the general fund by October 1, 2000, unless otherwise indicated in the General Appropriation Act of 1999 or otherwise provided by law.
  - F. The state budget division shall monitor revenue received by agencies from sources other than the general fund and shall reduce the operating budget of any agency whose revenue from such sources is not meeting projections. The state budget division shall notify the legislative finance committee of any operating budget reduced pursuant to this subsection.
  - G. Except as otherwise specifically stated in the General Appropriation Act of 1999, appropriations are made in that act for the expenditures of agencies and for other purposes as required by existing law for fiscal year 2000. If any other act of the first session of the forty-fourth legislature changes existing law with regard to the name or responsibilities of an agency or the name or purpose of a fund or distribution, the appropriation made in the General Appropriation Act of 1999 shall be transferred from the agency, fund or distribution to which an appropriation has been made as required by existing law

1 to the appropriate agency, fund or distribution provided by the new law.

H. In August, October, December and May of fiscal year 2000, the department of finance and administration, in consultation with the staff of the legislative finance committee and other agencies, shall prepare and present revenue estimates to the legislative finance committee. If these revenue estimates indicate that revenues and transfers to the general fund, excluding transfers to the general fund operating reserve, the risk reserve, the appropriation contingency fund or the state-support reserve fund, as of the end of fiscal year 2000, are not expected to meet appropriations from the general fund, then the department shall present a plan to the legislative finance committee that outlines the methods by which the administration proposes to address the deficit.

- I. Pursuant to Sections 6-3-23 through 6-3-25 NMSA 1978, agencies whose revenue from unforeseen federal funds, from state board of finance loans, from revenue appropriated by other acts of the legislature, or from gifts, donations, bequests, insurance settlements, refunds, or payments into revolving funds exceed specifically appropriated amounts may request budget increases from the state budget division. If approved by the state budget division, such money is appropriated. In approving a budget increase from unforeseen federal funds, the director of the state budget division shall advise the legislative finance committee as to the source of the federal funds and the source and amount of any matching funds required.
- J. For fiscal year 2000, the number of permanent and term full-time equivalent positions specified for each agency shows the maximum number of employees intended by the legislature for that agency, unless another provision of the General Appropriation Act of 1999 or another act of the first session of the forty-fourth legislature provides for additional employees.
- K. Except for gasoline credit cards used solely for operation of official vehicles and telephone credit cards used solely for official business, none of the appropriations contained in the General Appropriation Act of 1999 may be expended for payment of credit card invoices.

The rate of distribution of the state equalization guarantee distribution shall be based on a program unit value determined by the superintendent of public instruction. The superintendent of public instruction shall establish a preliminary unit value to establish tentative budgets for the 1999-2000 school year; and then upon completion of final budgets or verification of the number of units statewide for fiscal year 2000, but no later than January 31, the superintendent of public instruction may adjust the program unit value.

Included in the state equalization guarantee distribution is nine million five hundred thousand dollars (\$9,500,000) for the purpose of funding additional program units to implement early childhood education and is contingent upon legislation of the first session of the forty-fourth legislature becoming law that implements optional preschool and early literacy programs. The state department of public education shall distribute funds, upon program approval, to school districts that develop optional preschool and literacy programs to meet developmental and literacy needs of children age three through grade three. Such programs may include full-day kindergarten, half-day, summer or transition programs

for children ages three through five or intensive literacy programs for students in kindergarten through third grade to ensure that all children are reading by the time they complete grade three. The department shall report to the legislative education study committee and the legislative finance committee on program implementation by November 1999. Also included in the state equalization guarantee distribution is one million one hundred forty-three thousand four hundred dollars (\$1,143,400) for the purpose of funding a statewide early childhood program modeled after the even-start program.

The appropriation for the state equalization guarantee contains sufficient funds to provide a statewide average five and one-half percent salary increase for teachers and a statewide average four and one-half percent salary increase for other certified and non-certified staff including transportation employees.

The general fund appropriation in the state equalization guarantee distribution includes thirteen million one hundred ninety-five thousand six hundred dollars (\$13,195,600) to reflect the deduction of seventy-five percent of eligible local and federal revenues as defined in Subsections B and C of Section 22-8-25 NMSA 1978, contingent upon legislation of the first session of the forty-fourth legislature becoming law that reduces the percentage of receipts in calculating local and federal revenues; provided that if the reduced percentage is other than seventy-five percent, the state equalization guarantee distribution shall be adjusted accordingly.

The general fund appropriation in the state equalization guarantee distribution reflects the deduction of federal revenues pursuant to Paragraph (2) of Subsection C of Section 22-8-25 NMSA 1978 that includes payments commonly known as "impact aid funds" pursuant to 20 USCA 7701 et seq., formerly known as "PL874 funds".

The general fund appropriation to the public school fund shall be reduced by the amounts transferred to the public school fund from the current school fund and from the federal Mineral Lands Leasing Act receipts otherwise unappropriated.

#### Section 11. BUDGET REVIEW AND ADJUSTMENT PROJECT. --

- A. The state budget division and the legislative finance committee shall conduct a joint executive-legislative "budget review and adjustment project" involving select executive agencies that is designed to provide the executive and legislature with the ability to monitor and analyze the existing budget adjustment procedures and to strengthen the accountability of the budget adjustment request process. The project shall be structured by the state budget division and the legislative finance committee so as to provide the executive and the legislature with the necessary information and tools to effectively evaluate expenditures for necessary government functions and to provide long-range stewardship of state assets.
- B. The agencies are the attorney general, the taxation and revenue department, the general services department, the state fair, the human services department, the department of health, the children, youth and families department, the corrections department, the road betterment division of the state highway and transportation department, the state investment council, the educational retirement board and the public employees retirement association.
- C. The project shall establish the mechanism for budget increases or category, division, or interagency transfers of the agencies identified in Subsection B of this section, including a procedure for certification of the need for an increase or category, division, or interagency transfer. In addition to the procedures provided in Sections 6-3-23 through 6-3-25 NMSA 1978 for request and approval of a budget adjustment, budget increases or category, division, or interagency transfers allowed in this section for the agencies are subject to the conditions and procedures provided in Subsections D and E of this section.
- D. As a condition precedent to an approval by the department of finance and administration of a budget increase or category, division, or interagency transfer for an agency, the department shall certify to the legislative finance committee that a request meets the following conditions:
  - (1) the agency is not requesting budget increase authority or category, division, or

- E. Upon receipt of the certification by the department of finance and administration that a budget increase or category, division, or interagency transfer request pursuant to the project meets the conditions set out in Subsection D of this section, the legislative finance committee may raise objections to the certification within thirty days of receipt of the certification. If no objections are raised by the legislative finance committee within that time, the committee is deemed to have concurred with the certification by the department. If the legislative finance committee raises objections to the certification, it shall attempt to resolve the issues with the state budget division pursuant to the procedures developed for the project. The legislative finance committee may hold hearings on its objections to any certification. If the amount of the request is two hundred fifty thousand dollars (\$250,000) or more and the objections are not resolved satisfactorily through the project, the legislative finance committee shall make recommendations to the legislature regarding the certification. The rate of distribution of the state equalization guarantee distribution shall be based on a program unit value determined by the superintendent of public instruction. The superintendent of public instruction shall establish a preliminary unit value to establish tentative budgets for the 1999-2000 school year; and then upon completion of final budgets or verification of the number of units statewide for fiscal year 2000, but no later than January 31, the superintendent of public instruction may adjust the program unit value.

Included in the state equalization guarantee distribution is nine million five hundred thousand dollars (\$9,500,000) for the purpose of funding additional program units to implement early childhood education and is contingent upon legislation of the first session of the forty-fourth legislature becoming law that implements optional preschool and early literacy programs. The state department of public education shall distribute funds, upon program approval, to school districts that develop optional preschool and literacy programs to meet developmental and literacy needs of children age three through grade three. Such programs may include full-day kindergarten, half-day, summer or transition programs for children ages three through five or intensive literacy programs for students in kindergarten through third grade to ensure that all children are reading by the time they complete grade three. The department shall report to the legislative education study committee and the legislative finance committee on program implementation by November 1999. Also included in the state equalization guarantee

distribution is one million dollars (\$1,000,000) for the purpose of funding a statewide early childhood program modeled after the even-start program.

The appropriation for the state equalization guarantee contains sufficient funds to provide a statewide average five and one-half percent salary increase for teachers and a statewide average four and one-half percent salary increase for other certified and non-certified staff including transportation employees.

The general fund appropriation for the state equalization guarantee includes five hundred thousand dollars (\$500,000) to increase the number of program units for those school districts who have employed teachers certified by the national board for professional teaching standards. The appropriation is contingent upon House Bill 115 or Senate Bill 158 of the first session of the forty-fourth legislature becoming law.

The general fund appropriation in the state equalization guarantee distribution includes thirteen million one hundred ninety-five thousand six hundred dollars (\$13,195,600) to reflect the deduction of seventy-five percent of eligible local and federal revenues as defined in Subsections B and C of Section 22-8-25 NMSA 1978, contingent upon legislation of the first session of the forty-fourth legislature becoming law that reduces the percentage of receipts in calculating local and federal revenues; provided that if the reduced percentage is other than seventy-five percent, the state equalization guarantee distribution shall be adjusted accordingly.

The general fund appropriation in the state equalization guarantee distribution reflects the deduction of federal revenues pursuant to Paragraph (2) of Subsection C of Section 22-8-25 NMSA 1978 that includes payments commonly known as "impact aid funds" pursuant to 20 USCA 7701 et seq., formerly known as "PL874 funds".

The general fund appropriation to the public school fund shall be reduced by the amounts transferred to the public school fund from the current school fund and from the federal Mineral Lands Leasing Act
